BUSINESS DSL

Flexible solutions to meet your needs with
DSL from Ignite

ignite
YOUR BUSINESS. UNLIMITED.

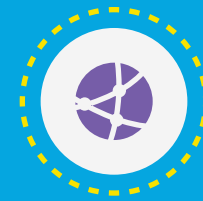

GET YOUR BUSINESS UP TO SPEED WITH DSL

High-performance DSL to suit a wide range of business needs

Fast and reliable Internet does not need to come at a hefty price. DSL from Ignite offers flexible solutions that can meet the needs of modern businesses at affordable rates, delivered through the existing Telkom infrastructure.

Choosing between a Capped or Uncapped solution allows you to get just the right solution so that you won't pay for excess capacity or features you don't need. Both offer premium packages that include Static IP Addresses for easier network access and a Zyxel Router.

As a best-effort service, you will need to consider your usage demands, whether it is regular Internet browsing and accessing applications, or the heavier demands of VoIP and Cloud Backup. If you are running an onsite email server or onsite application, you should consider a package that includes Static IP Addresses.

ORDER AND MANAGE ONLINE

Compare options, place orders and manage your account in one place

Choose the package that suits your requirements and budget on our online portal. Here, you can also manage your line and view your usage.

Ignite also offers DSL line rental as a fully managed service, offering ADSL and the extra-fast VDSL lines. We can make your landline DSL-ready, subject to the availability of DSL ports at the Telkom exchange in your area. Upload and download speeds are dependent on the Telkom infrastructure.

CAPPED OR UNCAPPED

Weigh your performance requirements and budget

With a **Capped** DSL solution from Ignite, you receive a set amount of data a month which you can top up as you need. This allows for businesses that don't require large volumes of bandwidth to keep costs consistent.

Plus, all Capped solutions are Unshaped, which means all protocols are treated with the same priority and offer optimal Internet access for applications like Skype, and secure networks from home or VPNs. So if you know your usage, you can cap your package and ensure the line speed is always optimal.

With **Uncapped** DSL, you get unlimited data and can access the Internet 24/7 without worrying about reaching your cap. Here, you have the benefit of a fixed monthly bill with no additional data costs. This is ideal for businesses with heavy usage requirements like VOIP or Cloud based applications that have high demands of your connectivity.

IS's Acceptable Use policy applies to our DSL offerings.

Through a Client Manager, you will have access to a Solutions Architect who will help you choose the best package to suit your needs and budget. The transition is seamless if you would like to upgrade your package.

CHOOSE A PACKAGE THAT SUITS YOUR BUSINESS

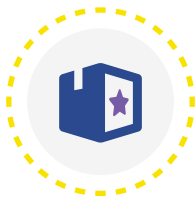

Ignite's DSL solutions lets you choose a package that's just the right size

Capped:

Ignite offers a choice between a Dynamic Capped and a Premium Capped DSL package to suit your business requirements. Capped Package Options for Dynamic and Premium include: 10GB, 25GB, 50GB, 75GB, 100GB, 150GB, 200GB and now include a 300GB option..

Very small businesses may find 10GB sufficient for emails and basic browsing requirements. Larger teams with heavier requirements may find 50GB or higher is needed to avoid reaching the limit too early each month.

DYNAMIC CAPPED	PREMIUM CAPPED
<p data-bbox="557 608 965 643">Free AlwaysOn WiFi: 1 x 300MB</p> <p data-bbox="593 699 929 730">Month-to-month contract</p> <p data-bbox="694 788 828 820">Unshaped</p>	<p data-bbox="1292 608 1655 643">Free AlwaysOn WiFi: 1 x 1GB</p> <p data-bbox="1305 699 1641 730">Month-to-month contract</p> <p data-bbox="1406 788 1541 820">Unshaped</p> <p data-bbox="1328 876 1621 908">5 x Static IP Addresses</p> <p data-bbox="1335 971 1615 1003">Zyxel Router included</p> <p data-bbox="1339 1059 1610 1091">Set-up fee applicable</p>

CHOOSE A PACKAGE THAT SUITS YOUR BUSINESS

Ignite's DSL solutions lets you choose a package that's just the right size

Uncapped:

Uncapped DSL has three DSL package options with various sizes that you can choose from:

- Small Office
- Business
- Premium

The sizes within these package options start from 2Mbps - 40Mbps.

Small to medium teams that aren't dependent on fast speeds for ordinary use may find 2Mbps adequate, while 10Mbps and higher caters for businesses that use media-rich data, view online videos in HD and require super-quick downloads.

SMALL OFFICE	BUSINESS	PREMIUM
Shaped during busy periods	Shaped and prioritised for Business Traffic (such as email, VoIP, Cloud-based applications etc.)	Unshaped
Month-to-month contract	Month-to-month contract	Free AlwaysOn WiFi (5 x 1GB)
2 x concurrent connections	2 x concurrent connections	5 x Static IP Addresses
Free AlwaysOn WiFi (1 x 1GB)	Free AlwaysOn WiFi (1 x 1GB)	Zyxel Router included Set Up Fee Applies

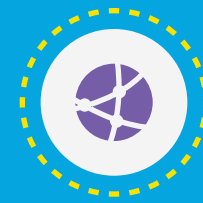

ORDER AND INSTALLATION PROCESS

Getting started is a simple process

- You will need an existing Telkom landline that needs to be ADSL-ready.
- You need to have ADSL enabled on your landline. If you would like us to help you, you can purchase the DSL line portion under DSL Add-ons on our online portal.
- If you already have an ADSL service enabled, then you're almost there.
- You will also need a router to enable DSL.
- When you buy the Premium Uncapped DSL package or the Dynamic Capped DSL package, you will receive a router as part of the package as this router contains the specific configurations for the Premium package. It will be delivered to you in approximately seven business days.
- If you are buying Dynamic Capped DSL or Small Office or Business Uncapped DSL, they do not include a router, but you can buy one under the DSL Add-On page on our website or you can use your own router.

TECHNICAL SPECS AND CONTRACT RULES

- Month-to-month billing.
- Pro Rata Billing applies; your billing amount will depend on when you buy the product within the month. You will only be charged for the remaining days in the month from the date of purchase.
- You require a landline from Telkom to enable DSL.
- The ADSL line must be ordered separately, which you can do on the Ignite portal under the DSL Add-ons page.
- If you have a Capped DSL Solution, you will be rate-limited to 128Kbps when you reach your cap. You can log into your Ignite account and buy a Top-Up Data Bundle.
- You can use your own router on all DSL offerings with the exception of the Premium Uncapped DSL offering and the Dynamic Capped DSL offering. These offerings have a preconfigured router to match the specifications of the package.
- Uncapped FUP is monitored and compared with all the users in that product pool. You will start with a five-star rating and drop a star if usage is too high.
- Product Terms & Conditions apply
