

ThinkCERCA Data Analysis Process

Adapted from National School Reform Faculty *Looking at Student Work Protocol*

1

Gather information about the data

What do you notice about the data?
Describe the data without judgement or interpretation.

2

Interpret the data

What is the data telling or showing you?
What are you learning about the data?
What are you learning about your students?

3

Implications for practice

What are the implications for your teaching?

4

Next Steps

What are some strategies you will implement based on the data analysis?

5

Next Steps: ThinkCERCA

What ThinkCERCA resources will you use for teaching, re-teaching, and / or assessing?

ThinkCERCA's Data Analysis Protocol

Adapted from National School Reform Faculty Looking at Student Work Protocol

1. Gather Information About the Data

- What do you notice about the data?
- Describe the data without judgement or interpretation.

2. Interpret the Data

- What is the data telling or showing you?
- What are you learning about the data?
- What are you learning about your students?

3. Implications for Practice

- What are the implications for your teaching?

4. Notes

- What are some strategies you will implement based on the data analysis?

5. Next Steps: ThinkCERCA

- What ThinkCERCA resources will you use for teaching, re-teaching, and / or assessing?
