PROGRAM DESCRIPTION

GeoEnvironmental Science Program

The GeoEnvironmental Science Program prepares students to enter the ranks of the technicians, scientists, project managers, planners, and regulators who work daily to preserve and restore the quality of our natural environment.

The GeoEnvironmental Science curriculum is exceptional and unique. It was developed in concert with potential industry and government employers and is taught by experienced professionals. The curriculum is built around three core areas: geoscience, geoenvironmental techniques, and environmental policy and safety. It is distinguished by many unique and specialized courses that teach critical concepts and hands-on skills.
