

Welcome to the smartest choice in solar

Getting started with the Enphase Home Energy Solution

Congratulations! Your system has been installed and verified operational by the installation crew. You may now be awaiting permission to operate from the utility. The installer will activate the system once you have utility approval. Within two (2) days of activation, you will receive a welcome email with a link to the MyEnlighten page and your temporary password. **The email address your installer used for your system is:**

If you have not received your welcome email within three (3) days of permission to operate, please check your spam folder, then contact your installer. On your first visit to MyEnlighten, you will be prompted to change your password. **Record your new account password here:**

Keep this guide in a secure location in case you need to look up your login details. Once logged in you can upload photos, add a description of your system, make the system publicly viewable (your address will not be disclosed), and more.

Thanks, and congratulations on making the smarter choice in solar technology.

Understanding Your System

Log in to see your system anytime at **enlighten.enphaseenergy.com**. Or download the MyEnlighten app from the **Google Play** or **App Store**.

MyEnlighten gives you information on how much energy your system is producing and alerts you to any trouble with the system.

Learn how to maintain your system and troubleshoot any issues by clicking on the **"Help"** button on the top right corner of the page or going to **enphase.com/myenlighten-help**.

Welcome to MyEnlighten

MyEnlighten connects you with your Enphase Home Energy Solution. You can monitor your solar production and energy storage, see how much energy you're using, and quickly confirm system health, all from any web connected device.

Share energy performance with your friends and family.

Quickly confirm performance. If there's an issue, you'll see a summary and troubleshooting tips.

Get a quick understanding of your energy use for the day. You can click back through previous days to see trends in performance.

Are you a data enthusiast? You can get detailed information on Enphase System production or energy consumption in multiple views.

This bird's eye view of your PV system gives you insight into overall system production. If there's an issue, this bird's eye view of your PV system will show exactly which panel is affected.

Visualize your energy trends and know where your energy is coming from. Blue represents your Enphase system production, orange is energy usage, and green is your energy storage.

Want MyEnlighten on the go?
Download the MyEnlighten app
for iPhone or Android.

Go to enphase.com/myenlighten-help to learn how to upload photos and a description of your system, run reports, and allow your system to be viewed by the public. (Your address will not be disclosed.)
