

Get your customers ready for storage

Enphase builds the foundation for energy storage.

A key part of the Enphase Home Energy Solution, the Envoy®-S Metered enables more cost-effective and reliable installations. When installing the Envoy-S Metered, you'll ensure the highest level of customer satisfaction by delivering total energy insight today and a foundation for energy storage tomorrow.

The Envoy-S Metered at a glance:

- Bi-directional communications
- Revenue grade metering
- 5-year warranty
- Easy to configure using Installer Toolkit mobile app
- Integrated WiFi and flexible networking options available

4 compelling reasons why selling Envoy-S Metered makes sense for your business

1. Envoy-S Metered paves the way for the Enphase Home Energy Solution:

- Gets your customer storage ready
- Tracks electricity generation and production to subsequently right size the Enphase Storage System
- Provides a smart platform for the Enphase Home Energy Solution, ready for plug-ins and apps through Enlighten

2. Make use of your existing database:

- Re-engage with hundreds of homeowners who had their solar systems installed through you

3. Now, take advantage of all your existing systems:

- Retrofit existing systems with total energy insight
- Get your customers committed to you and the Enphase Storage System

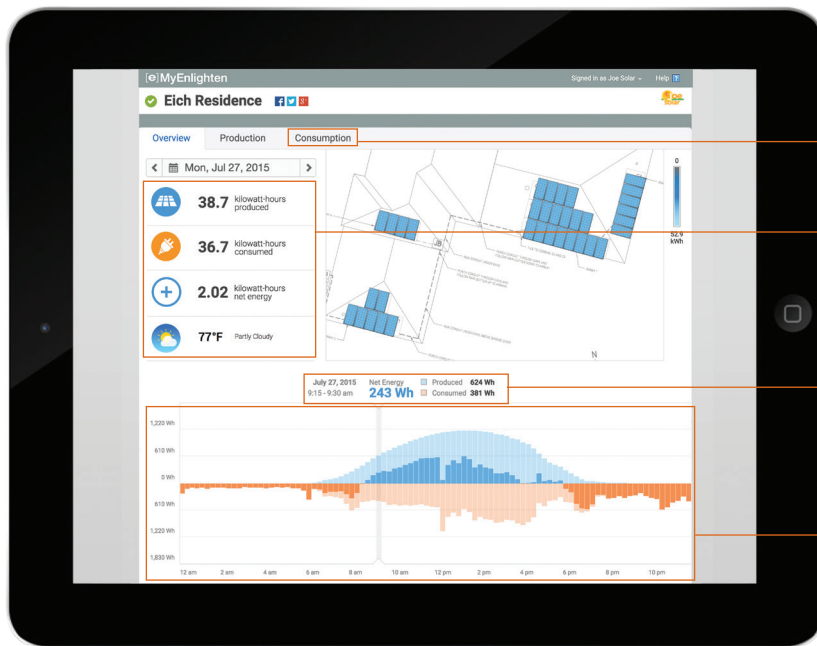

4. Provide a compelling offer to new customers:

- Install the only fully integrated system that is the Enphase Home Energy Solution
- Deliver a system with energy insights, greater system availability and a faster return on investment

Total Energy Insight

Envoy-S Metered now collects consumption data.

In Enphase MyEnlighten™, homeowners can now monitor Enphase System production and home energy consumption from any web-connected device.

Consumption monitoring and net energy reporting in 15 minute intervals.

MyEnlighten provides at-a-glance detail on system production and home consumption, giving your customer total energy insight.

Enphase will do the math on how much energy the system produced and how much electricity the household consumed.

Easily visualise trends in energy production and electricity consumption.

Insights from the Envoy-S Metered pave the way for storage.

How many Enphase AC Batteries are required?

Installing the Enphase Envoy-S Metered ahead of the Enphase AC Battery enables you to collect consumption data to determine the number of AC Batteries your customer will require.

What solar system can be fitted with Envoy-S Metered?

Any solar system – whether it's an Enphase Microinverter System or a traditional string system – can be fitted with Envoy-S Metered.
