Solar Rebate		\$39.87		

The solar panels have dramatically reduced the electricity bills considerably and, as an added bonus, they are actually creating a passive income stream.

Since the installation of the Solar Panels, TLC for Kids now has ZERO electricity costs (the above figures represent the overall electricity bills for the building). The saved funds have been redirected to the continuation of the vital relief services being provided to sick children and their families across Australia.

This could would not have been achieved if it wasn't for the generosity, support and kindness of Enphase, Suntech and Living Energy.

Thank you!
