

SUCCESS STORIES:

How Allscripts Users Win with RCxRules

The flexible integration of RCxRules software continues to help Allscripts PM users achieve outstanding results, including:

- 1 50% increase in coder productivity**
In the first two days of using RCxRules, Dallas Nephrology Associates—one of the nation’s largest nephrology groups—reported that the time required to perform the charge import-and-review process from the EMR into the PM was reduced by 50%.
- 2 \$15K per month in previously missed revenue captured**
By automating just two of the many administrative code rules available in the RCxRules software, ProHealth, a leading primary care physician organization, identified and began collecting an additional \$15,000 per month in previously lost revenue.
- 3 Better cash flow—and a 50% decrease in denials**
Chesapeake Urology, the mid-Atlantic region’s premier urology practice, went from collecting 80–85% of payments within 30 days of the patient visit to collecting 90–95% in the same period. They have also reduced coding- and charge-related denials by approximately 50%.
- 4 Lower training costs**
The ability to automate knowledge with RCxRules is delivering dramatic improvements for South Coast Health, an integrated network of primary care and specialty physicians. Now when staff members leave the team, their quantifiable knowledge remains in the organization’s RCxRules software, saving significant amounts of training time and money.

Improve your organization’s financial and operational health. To learn why several members of the Allscripts PM Advisory Board chose RCxRules, contact us at 802-735-0089 ext. 2 or sales@RCxRules.com today.
