

MEZZANINE Brilliant Visual Collaboration

For Teams and Rooms of All Sizes

Mezzanine offers advanced collaboration for rooms of all sizes—from small-to-medium-sized teaming spaces to large executive briefing centers. The complete family of offerings makes it easy for organizations to identify the most appropriate Mezzanine solution for their particular business need, team composition, and physical space.

Introducing Mezzanine

Mezzanine creates a **visually immersive meeting environment** for teams to do their most important work. The **dynamic multi-screen workspace** commands attention when presenting information. **Real-time content-sharing from multiple sources** makes complex sets of data accessible to all. Teams get the big picture and make better, more confident decisions.

Mezzanine solutions engage audiences and support seamless, active participation from all levels of an organization, greatly improving the effectiveness of collaborative work. An independent study by Forrester Consulting found Mezzanine delivers significant improvements in the efficiency of business processes including internal workflow and collaboration, customer engagement and sales, and service delivery to clients. Mezzanine provides a rapid return on investment and improves existing investments in your workforce and workplace.

Concurrent multi-user interaction encourages participation. There's no waiting to share your screen or to contribute to the conversation—creativity flows without disruption.

Visual immersion helps teams form a big-picture view of crucial business intelligence.

Gestural interaction lets users place content anywhere in the room from anywhere in the room.

Multi-screen workspaces provide generous work areas for teams to share, organize, and analyze multiple streams of content and applications from their devices.

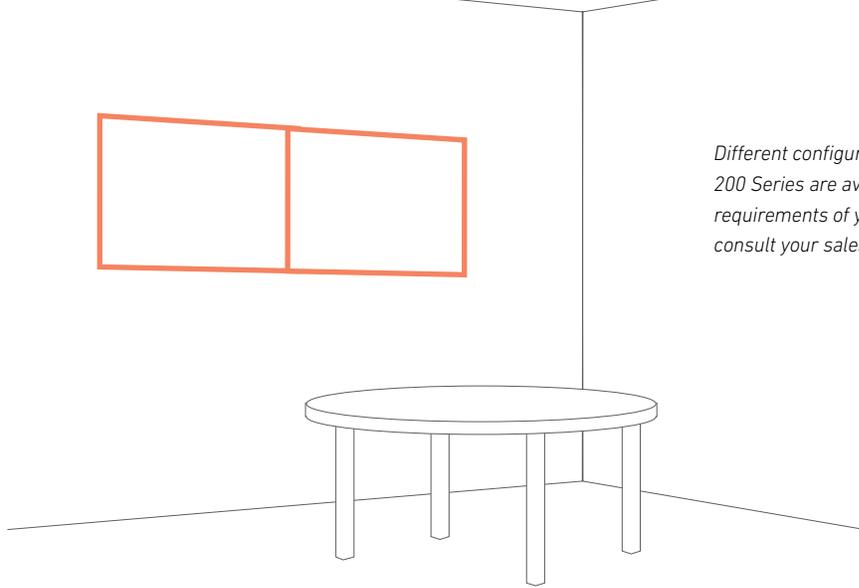

Connected Mezzanine rooms allow geographically dispersed teams to see the same things in the same way, accelerating knowledge-sharing, consensus, and high-quality decision-making

Infopresence Collaboration

Infopresence is the **experience of being physically and cognitively immersed in your work**, where all of your teams' critical content and data is visually and physically accessible. Mezzanine delivers Infopresence to your teams, no matter where they work.

Infopresence is characterized by fluid interactions between users, content, and locations in shared visual workspaces. It accelerates discovery and decision-making to address rapidly evolving business challenges, turning collaboration into a competitive advantage.

Different configurations of the Mezzanine 200 Series are available to match the precise requirements of your teaming spaces. Please consult your sales representative.

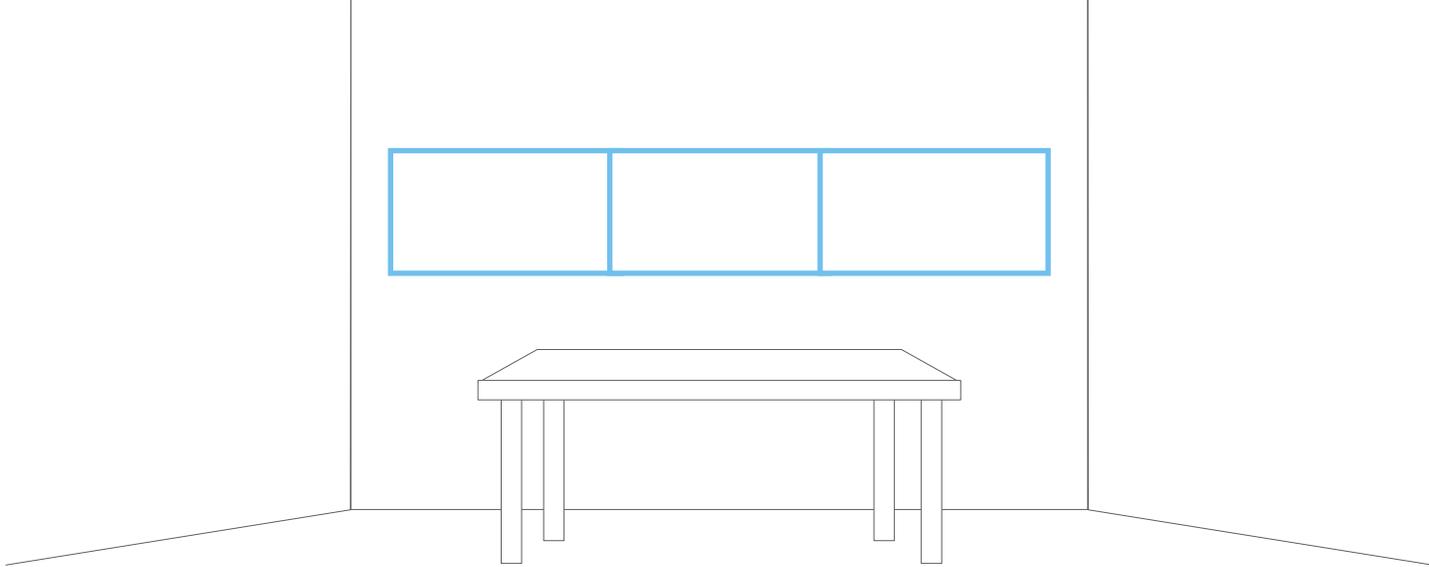

MEZZANINE
200
SERIES

This dual-screen configuration for **small-to-medium-sized teaming rooms** delivers **advanced collaboration capabilities** previously accessible only in large and exclusive rooms.

Concurrent viewing of up to ten shared devices, gestural interaction, and real-time control by multiple participants are now available in a familiar form factor.

Your workforce is increasingly distributed—empowering them to collaborate seamlessly is what your business needs. Mezzanine 200 removes barriers to participation and enables contribution from any device, anywhere around the globe. This shared visual context is precisely what's required for the discussion and creation of mission-critical work.

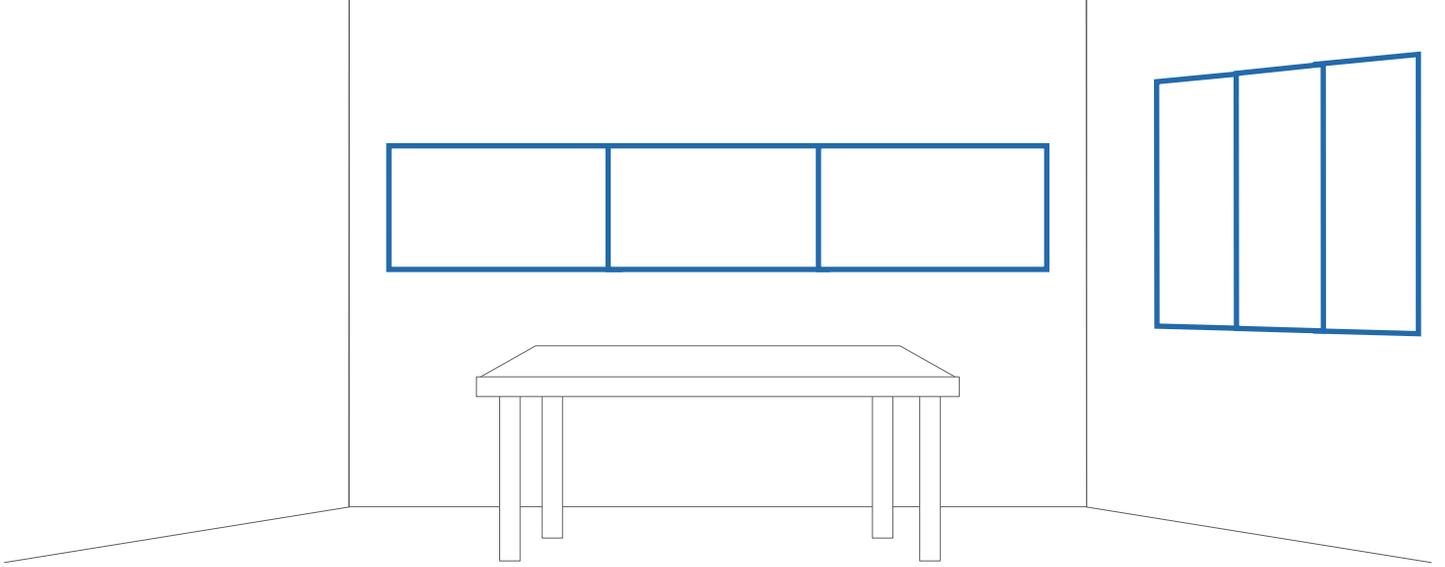

MEZZANINE
300
SERIES

With Mezzanine 300, teams can easily share their devices and applications across three screens for an **unparalleled, content-forward experience**.

The three-screen workspace matches our flagship 600 Series, allowing customers to extend the immersive Mezzanine experience to branch offices at a lower cost.

If additional displays and surfaces are required, Mezzanine 300 systems can be upgraded to a Mezzanine 600 configuration.

MEZZANINE
600
SERIES

The 600 series features six screens that can span multiple walls, creating a **truly immersive environment** for customer engagement and collaborative work.

The three primary screens function as a shared workspace when collaborating with other 600 and 300 systems, ensuring that everyone is looking at the same content and data in the same way.

Mezzanine 600 also features a new spatial tracking system and compact hardware footprint which enables in-room installation, ultimately reducing costs and installation complexity.

MEZZANINE
650
SERIES

Mezzanine 650 is Oblong's most immersive and extensible offering. Up to six screens can be configured as a video wall, and additional Mezzanine appliances can be connected to extend your workspace to utilize more walls and screens. Mezzanine 650 delivers the visual real estate required to tell truly expansive and engaging stories and display all critical factors in a complex project or business challenge.
