GISinc GI-STAR Service Bundle

Overview

GI-Star, is a multi-purpose application code owned by the South Carolina Army National Guard (ARNG), with a tailored suite of capabilities.

By leveraging GISinc's OneView framework, GI-STAR will extend the reach of your GIS and mission data along with publicly available data providing web access to intuitive, feature-rich tools and applications.

This powerful service bundle will also enable users to conduct analysis, execute workflows as well as input and access data in the field via mobile devices such as tablets and smartphones.

GISinc GI-STAR Bundle Key Features

Cost Savings - Implement web mapping applications supported by ArcGIS Enterprise

Rapid Implementation - Tailor existing GI-STAR ARNG tools, scripts, and views

Secure Access - Control user access layer by layer and tool access with the built-in security of ArcGIS Enterprise

Cloud Ready - Deployable on FISMA/FedRAMP accreditable cloud environment

Mobile Ready - View & share maps on multiple platforms including Apple and Android smartphones and tablets

Energy Statistics - Monitor and manage total energy and water costs as well as historical utility

Unit Drive - Analyze commuting patterns and distances for personnel while forecasting the impact of unit relocation on commute

GPS Photos - View actual facilities images tied directly to management records

Armory Tool - Access armory location details in one simple layer

Document Management - Manage, search, select and interact with documents using the map

Virtual Tours - Explore any map point with an easy click-by-click tour

* Pricing may vary based upon level of customization, performance, data size, data prep. and hosting footprint.
