

Innovating the Power of Where

Asset Tracking - The Ability to Find it, Fix it, and Use it...in Real-Time

Whether its inventory, equipment or personnel, we understand the importance of locating, maintaining and maximizing the potential of your assets. With GISinc GeoIoT™ Asset Tracking, you save time while increasing overall efficiency with real-time insights.

We integrate with other business systems to use both indoor and outdoor tracking technology with Bluetooth and RFID technology. By providing the ability to track movement and status of critical assets in a spatial context, we empower you to make strategic location and behavior driven decisions.

Location

- View location of any asset(s) in real-time
- Identify named assets, associating unique identifiers, with physical tags
- View key defined zones within a facility
- Determine, automatically, where an asset is located

Behavior

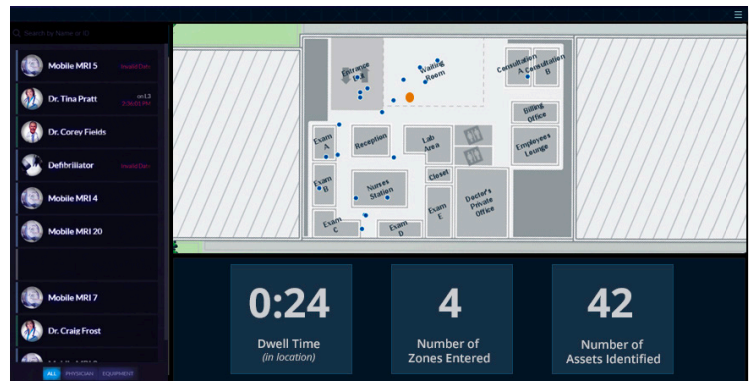

- View “breadcrumb” trail tracing an asset over any historic time period
- Summarize zones an asset visited over a given time period
- Summarize and understand the time assets spend in individual or combined zones over specific time periods

Technology

- Bluetooth Low Energy (BLE)
- Radio Frequency Identification (RFID)

Software Options:

- ArcGIS Online
- ArcGIS Enterprise with GeoEvent Server Role

Who We Are

As a Geospatial IoT (GeoIoT™) Integrator, we’re combining the infinite capabilities of the Internet of Things (IoT) with best-in-class pairing with our unmatched Geographic Information Systems (GIS) expertise to provide GeoIoT solutions. For more than 25 years, GISinc has been the worldwide leader maximizing spatial relationships as they relate to right-sized enterprise and mission-critical geospatial solutions on a macro level. Our GeoIoT Platform is helping organizations visualize their data by location, while becoming more insightful, more efficient, more competitive, and more productive.
