

# GeoloT PLATFORM

*Innovating The Power of Where*

As an Geospatial IoT (GeoloT) Integrator, we're combining the infinite capabilities of the Internet of Things (IoT) with our unmatched Geographic Information Systems (GIS) expertise to provide GeoloT solutions. For more than 25 years, GISinc has been the worldwide leader maximizing spatial relationships as they relate to right-sized enterprise and mission-critical geospatial solutions on a macro level.

## GeoloT Platform Capabilities

Asset Tracking

Occupant Management

Energy Savings

Space Utilization

Situational Awareness

Analytics & Data Sciences

### What is GeoloT?

A best-in-class pairing of location technology and IoT integration applies powerful spatial analytics for indoor positioning at a micro level. With GeoloT, the risk and the learning curve of integrating solution components is minimized with sensors, devices, platforms, data, back-end systems, and analytics with location-awareness.

GIS brings value to IoT by helping organizations visualize their data by location, while becoming more insightful, more efficient, and more productive. IoT creates an abundance of real-time data that transcends standard geographic information provided in traditional thematic layers.

GISinc is making the blue dot intelligent with GIS.

**A Premier GIS Services Firm providing innovative IoT solutions through geospatial technology.**
