- Educator:** **Mr. Ken Kincaid, CDT**
Owner of Bismarck Mandan Dental Lab, a family owned lab
in Bismarck, ND

Bismarck Mandan Dental Lab prides themselves with staying up to date with all the newest technologies, even as a small laboratory. Along the way they have learned many valuable lessons and exceeded their expectations when it comes to digital design and manufacturing.

Ken currently assists in all aspects of crown and bridges and removable partial design. With the support of BEGO USA, Bismarck Mandan Dental Lab has grown to be one of the greatest digital age partial denture labs in America. Due to Ken's success, labs across the country regularly call for support with their digital needs.

Course Objectives:

- Provide proven technique in the design of removable partial dentures
- Learn to nest, print and to maximize your digital proficiency
- Understand the process of investing, casting and finishing your RPDs

Course Description:

During this two day course you will experience the full BEGO system, from alloys and investments through burn out and casting. You will be taught how to scan and design RPDs with the use of 3Shape software, nest on 3Shape CAMbridge, and the 3D printing process using the new Varseo S printer by BEGO. You will leave this course feeling confident and ready to design and print RPD frames utilizing the BEGO digital workflow system.
