

WHAT'S ON MY BENCH?

"Lifetime learning is a motto that I live by."

**DANIEL ALTER,
MSC, CDT, MDT**

Owned and Operated a 17-manned lab for 17 years, now is in full-time academia as a Professor of Restorative Dentistry

I believe in communication with the Dentist and the Laboratory. It's important to know everyone's expectations. Pictures do a nice job with communicating.

It's important to make the tools on your bench effective as possible. Combined with a dental technician's intelligence, experience & knowledge you will get the best final restoration. I am of the mindset that CAD/CAM and artistry combined will achieve the best outcome for the patient.

Some of my favorite products are:

1. GC Initial IQ Lustre Pastes
2. Wagner Contouring Tools
3. Renfert lay:art Style Set Brushes
4. Renfert lay:art Color — Stain Tray
5. Meisinger Luster Finishing Tools
6. Harvest Dental Super Peg II
7. Vita Shade Guide
8. MPF EVOLUTION: Master Ceramic Palette
