

SICPASTAR® HOT STAMP SECURE COLOR-SHIFT

INSTANT AUTHENTICATION TO PROTECT CARDS & ID DOCUMENTS

ABOUT SICPA

Founded in 1927, SICPA is a global leader in authentication, identification and secure traceability solutions and services that partners with governments, financial institutions, businesses and industries worldwide on matters related to security. With billions of products secured every year, SICPA is the world leader in secure traceability solutions and is recognized supplier and consultant to industries, security printers, governments and central banks.

SICPASTAR® Hot Stamp Secure Color-Shift displays an instantly recognizable color-shift when viewed at different angles, securing everything from IDs to vital records and all kinds of plastic cards. The innovation opens this robust security feature to printers who have not had the technical ability to print color-shift security previously.

Combined with a machine-readable covert feature, this multi-layered security solution provides unambiguous authentication for all parties. SICPASTAR® Hot Stamp Secure Color-Shift adds security over holograms, and it has other advantages, including no origination fee and ease of changing the die for any customer's needs.

With government ID security requirements expanding, SICPASTAR® Hot Stamp Secure Color-Shift can be used as a secure alternative to traditional holograms in that space as well.
