

## CAMPUS HEALTH AND SAFETY PLAN

*Note: This plan is available upon request at the Campus Director's office*

An appropriate plan for assuring the health and safety of the institution's employees, students, and guests has been developed. This plan is available to students and staff members who are required to read and adhere to our policy regarding safe conduct. Vantage College recognizes that having a safety and security plan in place including procedures to be followed in case of severe weather, fires, bomb threats, intruders, serious injury or illness, tornadoes, floods, and hurricanes permits the institution to respond quickly and effectively to incidents that may occur. The plan reflects the commitment to student achievement and a supportive learning environment.

Vantage College uses a Student and Staff Accident Report to report and investigate accidents for staff, students and guests. Vantage College provides for the health and safety of all individuals through inspections established by the campus director, facility safety features, campus custodial services, evacuation plans, annual fire inspections, first aid kits, onsite CPR trained personnel, evacuation plans, and safety practices.
