

Overview

VIP Integrated Payments

VIP is a leading provider of integrated payment technology solutions to US based merchants, differentiated by our strategic partnerships and multiple platform model. We provide a broad suite of end-to-end payment solutions and superior US based customer support. Our solutions offered through a diversified network of partners and alliances built over more than 15 years by integrating and developing relationships as part of our drive to help our business partners and customers grow.

VIP is your all-in-one payment management resource

VIP centralizes payments to make your job easier and help you run a smarter business. It lets you save time by viewing and controlling all your payment types and environments from a single platform.

Products and solutions

ACH, Debit, and Credit Card Processing

Accept payments including all major credit cards, debit card, and ACH from your customer anytime, anywhere.

Accounting Software Integration

We know that time is money. That's why we offer several credit card and ACH products that integrate seamlessly with industry-leading accounting software.

Next Day Funding

Keep your business running smoothly by having your transactions deposited to your bank account next business day.

Virtual Terminal, Mobile, Point of Sale, and ecommerce

Process payments how you would like! By utilizing a web browser, mobile device, or a Point of Sale system. You can keep your customers happy by offering a convenient and secure method of processing payments.

High Risk

VIP offers products and services tailored specifically to merchants that traditional institutions will not support because you still need a way to accept credit card, debit, or checks/ach payments. If you have had issues getting your merchant account approved, regardless of reason, VIP has options for you!

Benefits

- Accept payments, including all major credit and debit cards, from your customers anytime, anywhere.
- Optimized interchange for lower processing fees. Level 2 & 3.
- Electronically deposit checks without making a trip to the bank.
- Account Updater
- Process all payments safely and securely in a PCI Compliant environment, including ACH transactions.
- Minimize exposure to hackers and fraud with PCI-compliant security and encrypted credit card processing.
- Choose the methods of payment acceptance that are best for your business, including mobile payment devices, virtual terminals, EMV, P2PE, standalone terminals, e-commerce shopping carts, mail or telephone order, storefront, and third-party software or Point of Sale.
