How Did RChilli Help Hitachi Store a Large Volume of Resumes in the Database?

“RChilli has revolutionized our recruitment processes by transforming unstructured candidate data into structured information. This has streamlined our workflow and significantly reduced our recruiters' time on candidate evaluation.

Team Hitachi

About Hitachi

Hitachi Systems Micro Clinic, a market leader in providing end-to-end IT solutions and services to businesses, is a result of a relentless journey that began in 1991.

To help businesses adopt resilient and state-of-the-art infrastructure, the company offers customized IT solutions to businesses by collaborating with OEM vendors. These solutions are being delivered to more than 3000 customers.

The company is committed to working with the utmost dedication to the welfare of society by leveraging new technology from time to time.

Skilled resources and expertise in international IT practices is the reason behind its success.

Hitachi

Segment: IT Services

Requirements

Managing large volumes of resumes led to misplaced documents and overlooked quality candidates. Manually sorting resumes was time-consuming, taking hours to find the best fit for job vacancies.

Solution

RChilli's [resume parser](#) automated bulk uploads and data extraction, simplifying the application process and eliminating lengthy forms and manual scanning.

Results

- Increased candidate relevancy by up to **40%**.
- Saved **70%** of recruiters' time spent on evaluating resumes.
- Accelerated time-to-hire by up to **50%**.

Starting the Journey to Manage the Large Volumes of Resume

Hitachi struggled with managing large volumes of resumes, leading to misplaced documents and overlooked candidates.

Manually sorting resumes was time-consuming. They needed a solution compatible with their ERP designed by Flexiele to streamline recruitment.

Hitachi found RChilli's solution, which automated resume management and transformed unstructured data into structured information.

This eliminated manual sorting and significantly reduced the time spent finding the right candidates, enabling Hitachi to focus on hiring quality talent efficiently.

3 Ways RChilli Boosts Hitachi's Productivity

How Did Hitachi Meet RChilli?

Hitachi needed a solution to efficiently manage large volumes of resumes and simplify their recruitment process. They found RChilli's advanced [resume parser](#), which extracts data into **200+ fields** like education, experience, skills, and qualifications.

This tool automated resume management and eliminated manual sorting, transforming Hitachi's recruitment process with intelligent, data-driven interactions and efficient candidate evaluation.

The application process was also simplified for candidates, who could quickly submit resumes without filling lengthy forms, as the parser automatically populated the necessary fields.
