SAP Education Services

Redefine your Career

TallyBiafo Academy

TallyBiafo is the brainchild of Abdul Haseeb of TallyMarks Consulting and Usman Malik of BiafoTech, who shared a vision to impart their technical know-how of their respective fields to bring awareness of knowledge regarding SAP Education at the University level. With that concept in mind and the aim to provide quality SAP certified consultants to the industry we have undertaken this venture. Time and again, students have found out about the importance of SAP certification after entering their profession and in order to stand out in their field an understanding of SAP and SAP related courses is an added benefit and would hone one's career in the long run.

Due to shortage of SAP consultants in Pakistan, this initiative provides a platform to make up for the lack of experts in the market. We are offering SAP Learning Hub with the option of Student and Professional Editions. In addition to that, we provide training workshops that are conducted by our consultants, who are seasoned & noteworthy ones with multiple industry experience under their belts.

SAP – The definitive ERP Market Leader

System Application and Product (SAP) is a set of powerful tools that integrates multiple business process and functions into one comprehensive system. It has a heritage of 40 years as market leader.

- Offering trainings for both students and professionals.

SAP Learning Hub

The Learning Platform for Digital Business from SAPLearn SAP how and when you want – with SAP Learning Hub.

Companies are investing in technologies to create digital processes and streamline existing workflows. Success depends on your people quickly becoming proficient with new systems and applications. This takes serious training, for inexperienced users and seasoned pros alike. SAP Learning Hub is tailor-made for this critical challenge. It offers enterprise-wide access to the full SAP knowledge base of guided skill-building, social learning, and self-paced training through multiple formats such as e-learning and e-books – all for a single affordable subscription fee. SAP Learning Hub is cloud-based, enabling you to learn at your own pace and tailor a program to suit your individual needs.

Unlimited learning, anytime, anywhere.
With SAP Learning Hub, your business and technical users have 24/7 access to a wealth of training tools and materials from SAP on demand, in multiple formats and languages, that are always up to date
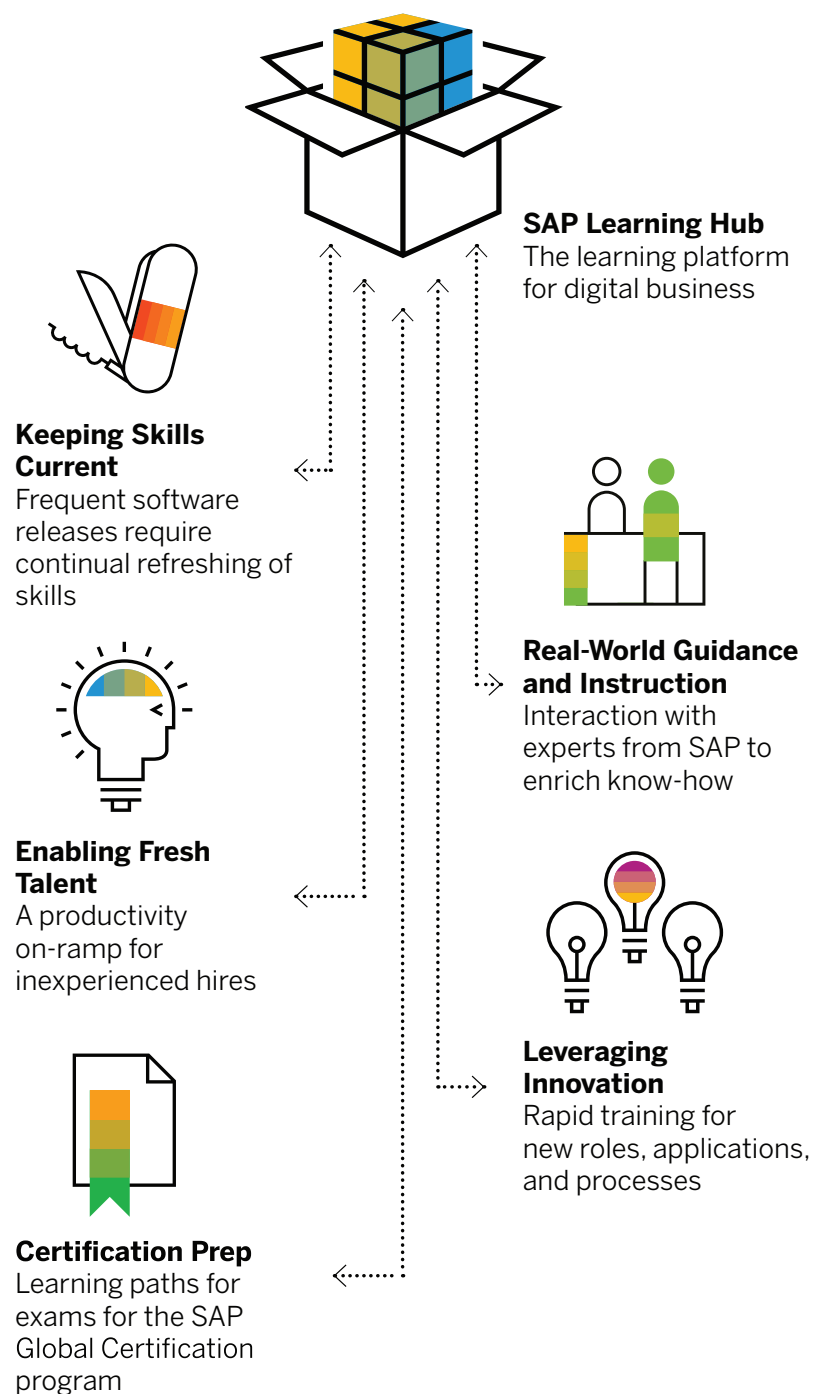

Easy to purchase, afford, and manage.
One modest yearly subscription is all it takes to deliver a learning platform from SAP across the enterprise. SAP Learning Hub lets you optimize time spent on course scheduling and employee travel. It also frees you from the effort and expense of having to produce and deliver specialized content yourself, for example, upskilling and refresh materials for frequent new releases of software. At a lower cost per user than a single three-day classroom seminar, your entire organization gains access to training covering the full SAP software portfolio.

Learner-centric experience. Training materials are provided in a variety of formats to fit individual learning styles. Users can choose from self-paced e-learning courses, e-books, and social learning forums led by SAP experts who provide instructional guidance and answer questions. SAP Live Access systems supplement these offerings with hands-on practice.

Faster enablement, higher adoption, and greater software ROI.
Our broad spectrum of convenient, proven training tools shortens the time to software productivity. Users quickly acquire the skills and confidence to deliver demonstrable value & transformative business outcomes.

SAP Learning Hub is a standalone learning platform that can also be combined with traditional training as part of a blended learning strategy. A private cloud version of SAP Learning Hub is also available to offer additional flexibility and customization options.
