Solution Goal

Graduate highly
productive employees

Who benefit from us?

- Governments who would like support nationals to find jobs
- Fresh graduate who would like to have better opportunity to find a job
- Companies who would like to hire highly productive employees
- Universities who would like to enable the students for the work environment

What problems we're solving?

With the advances information technology has made, the gap between the current educational system and the requirements in a work environment continues to grow wider. Most of the job will be performed better if employees utilize software. However, fresh graduates are far from ready to take on the job, they just come with skill sets that are no longer sufficient. These fresh graduates aren't equipped to do a productive job as they don't have the right tools to use.

What are we offering?

We are enrolling the fresh graduate in programs that will build their capabilities in modern essential jobs. Post graduation, we are give our graduates the full right to use our software without any additional charges to benefit the organizations they work with. The modern jobs will be essential for any organization success:

Digital Transformation
Success Manager

Mindset Transformation
Success Manager

Strategy Execution
Engagement Manager

Employee Performance
Executive

Process Automation
Expert

Software Development
Master

What's our differentiation?

We are the only academy who can provide the tools to the graduates. We will be creating partnerships between the fresh graduates and Exceeders' software to create a highly skilled, competitive candidate who can perform better at the job. The skill and creativity of top fresh graduates, combined with the power of cutting-edge software, and supported by the Exceeders network, will enable these fresh graduates to do the job better than anyone on the market.

The Factor

Our **graduates'** productivity will be higher than any other employee add they will come with their tools. Organizations that hire them will benefit from using our software free of charge.

We save the organization hundred thousands of dollars while we provide them when the best candidate to do the job.
