- ✓ 24x7x365 Monitoring
- ✓ Vulnerability Assessment
- ✓ Laptop / PC & Server Anti-Virus
- ✓ Intrusion Detection & Prevention
- ✓ Backup and Disaster Recovery
- ✓ Email Security
- ✓ Dual-Authentication
- ✓ Security Training

About the Services

Anti-Virus, Intrusion Detection & Prevention: End-point-level (Laptop / PC) anti-virus and Intrusion Detection & Prevention for your business.

Managed Firewall, 24x7x365 Monitoring: Monitor incoming and outgoing network traffic and prevent malicious activity

Email Security: 83% of malware is deployed via email. Block phishing attempts and malicious attacks sent via email.

Backup as a Service: Get backups off-premise and into the cloud to safeguard your data. Replication services available with Cybersecurity for Midsize Business.

Security Information & Event Management: Monitor all of your security applications and data logs in real time via one platform with our Security Information Event Management (SIEM) tool.

Security Training: Improve the security training of your employees with our security awareness training tool.

Dual Authentication: Help your business secure its log-in process with dual-authentication.

Vulnerability Assessment: A network assessment tool that identifies and shows vulnerabilities in your network and laptops / PC devices.

"NewCloud gives us confidence that our data is safe, secure, and compliant. And if an issue arises, I have a partner in my corner that can fill any hole and answer any question. It has changed the way we do business."

Terry Boe, President, Integral Recoveries
