

AAM's Locksmith automates the entire process so you never have to worry about KDMs again.

Locksmith gives you:

- Single point of ingest for the whole circuit, removing the need to email KDMs to individual sites
- Automated delivery of KDMs all the way to the projection system
- Full visibility of KDMs across the whole circuit
- Notification of KDM issues so they can be fixed before shows are lost

WHAT IS LOCKSMITH?

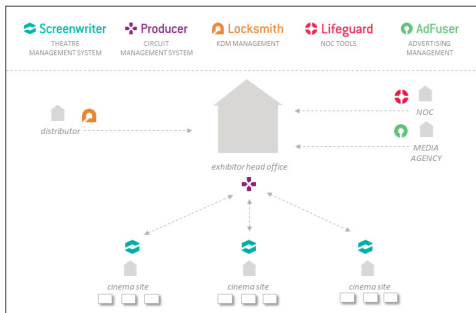

LOCKSMITH is a service to automate the entire KDM process - so you never have to worry about KDMs again.

With Locksmith, KDMs are managed in the background so staff can focus on the customer experience, safe in the knowledge that KDM issues won't cause missed shows.

With Locksmith there is no need to email individual keys to cinemas, instead KDMs can be managed from one central location, with keys delivered to the right screen automatically.

Comprehensive reporting allows you to see which KDMs have been successfully delivered, and which haven't.

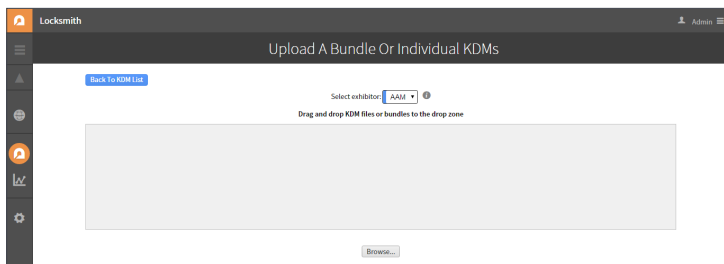

AAM's Integrated Software Solution

KDM DELIVERY

Upload KDMs centrally and have each examined and delivered directly to the relevant screen server ready for playout, increasing accuracy and avoiding missed shows.

- Email all KDMs to one location, or upload via Locksmith's web interface.
- Connect to an email account to automatically strip KDMs from emails and ingest into Locksmith.
- Each KDM is stored in Locksmith's central repository and automatically delivered all the way to the correct media players.
- Less human interaction means less room for error.
- Request re-delivery of KDMs at the touch of a button.

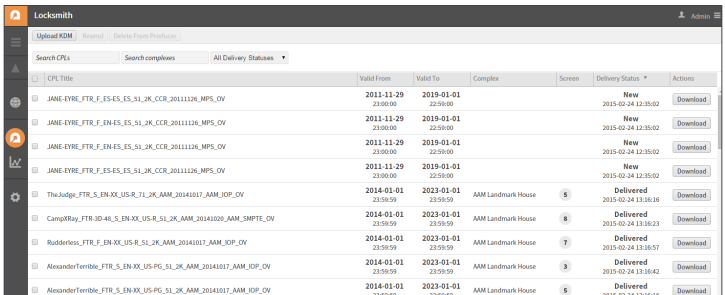

Upload via web interface

VIEW AND SEARCH KDMs

Locksmith makes it easy to keep track of KDMs across your whole circuit.

- View all KDMs across entire circuit from one screen.
- Search and filter by CPL, complex or delivery status, so you can easily see where you have errors.
- See confirmation of successful ingest at both TMS and media player level, and identify wrongly targeted KDMs so replacements can be ordered in plenty of time.
- Resend KDMs at the touch of a button in the event of accidental deletion at site.

The screenshot shows the Locksmith application interface. At the top, there are buttons for 'Upload KDM', 'Resend', and 'Delete From Producer'. Below these are search filters: 'Search CPLs', 'Search complexes', and 'All Delivery Statuses'. The main table lists KDMs with columns for CPL Title, Valid From, Valid To, Complex, Screen, Delivery Status, and Actions. The table contains 10 rows of data, including KDMs for JANE-EYRE, The Judge, CampRay, Rudderless, AlexanderTerrible, and others. Each row has a 'Download' button in the Actions column.

CPL Title	Valid From	Valid To	Complex	Screen	Delivery Status	Actions
JANE-EYRE_FTR_F_ES-ES_ES_S1_2K_CCR_20111126_MPS_OV	2011-11-29 23:00:00	2019-01-01 22:59:00			New	Download

REPORTING

Comprehensive reporting allows exhibitors to see which KDMs have been delivered and ingested, and which haven't. See reports on upcoming KDM problems to avoid missed shows.

- See at a glance when missing KDMs are threatening shows, allowing you to fix the problem in plenty of time.
- View all complexes on a dashboard, so sites with errors can be easily identified.
- Automatically generate trusted device list reports in industry standard FLM-x format so that distributors are kept informed about any equipment changes and can re-generate the correct KDMs.

The screenshot displays the Locksmith application interface. The top navigation bar includes the 'Locksmith' logo and a user profile icon labeled 'Admin'. The main content area is divided into three columns: 'Today', 'Tomorrow', and 'Day after'. Each column contains a 'KDM Issues' section with a list of issues and their affected schedules. For example, under 'Today', there are issues for 'TheJudge_FTR_S_EN-XX_US-R_71_2K_AAM_20141017_AAM_IOP_OV' (affecting 21 schedules) and 'GODFATHER_PT1_FTR_F_EN-XX_US-R_51_4K_PC_20110520_MPL_OV' (affecting 1 schedule). The 'Tomorrow' and 'Day after' sections show similar issues for 'SecondBEMH_FTR_S_EN-XX_UK-IE_51-VI_2K_TCF_20150119_ERN_IOP_OV' and 'TheoryEverything_FTR_S_EN-XX_UK-TD_51-EN_2K_UP_20141203_MPS_IOP_OV'. A map of the United Kingdom is shown below the 'Today' section, with various locations marked with green and red icons. To the right of the map is a 'All Complexes KDMs' section, which lists complexes and their KDM status. The bottom right corner of the screenshot features the text 'See all upcoming KDM problems' in orange.

TMS Support *

AAM Screenwriter; Christie Avias™; Cinemeccanica Cinecloud™

**Support for sites with no TMS or other TMS systems can be provided through AAM's Theatre Core technology. Contact us for more details.*

Media Player Support

Barco; Christie; Dolby; Doremi; GDC; IMAX; Qube; Sony; USL

Projector Support

Barco; Christie; Cinemeccanica; Kinoton; NEC; Sony

Web-based User Interface

Best in class and easy to use. Unlimited number of client connections.

Browser Support

Firefox; Chrome; Internet Explorer 9+

Language Support

English; Chinese; German; Italian; Japanese; Portuguese; Russian; Spanish; Turkish

Hosting

Provided by AAM as cloud-based SaaS (Software as a Service)

Accessible through secure VPN or through secure HTTP with 2 factor authentication
