Montgomery Build

Habitat for Humanity Southern Alberta (HFHSA) is excited to begin construction on a new development in the NW Calgary community of Montgomery. The build site is located at 4807 Bowness Road NW, Calgary, Alberta.

This development will consist of a four-plex, with each unit between 1,000 – 1,050 sq. ft. The homes will meet the building specifications and environmental sustainability of the community.

HFHSA is extremely grateful for the support of our community partners who are committed to building safe, decent and affordable homes locally in which families can thrive.
