

SUPERCHARGE YOUR ASSOCIATION EVENTS

Digitize your association meetings and increase member engagement, learning, and connections with the DoubleDutch Live Engagement Platform. Below are some key capabilities you can leverage to energize members at your next meeting or conference.

INCREASE EVENT CONTROL

Event Copying and Templates

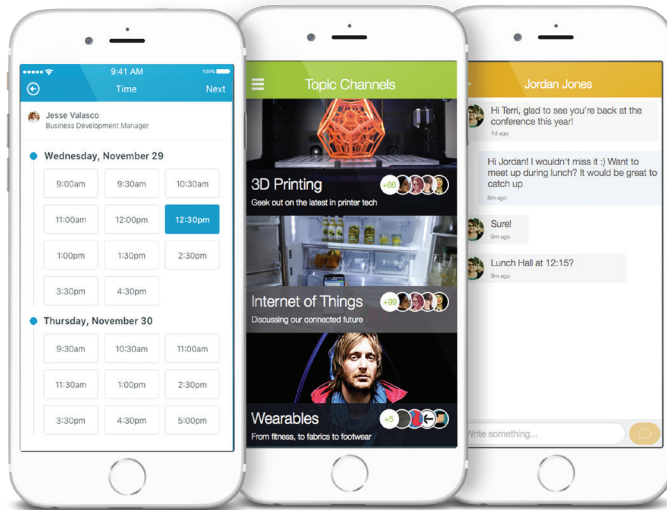

Create and manage all your events in one place. Get started quickly with a guided onboarding tutorial and leverage best practice templates and content for specific event types to ensure success. Save time by duplicating past events in just minutes.

Content Visibility Permissions

Personalize content and experiences by managing in-app content visibility for any attendee group. With flexible attendee segments and rules, you can control sensitive information while personalizing app content for VIPs, exhibitors, speakers, and more.

Sub-Sessions Agenda

Make it easy to navigate events with complex agendas, such as medical or scientific conferences. Easily display multi-level Main Session and Sub-Session agendas, along with complete session details, via integrations.

FACILITATE MEMBER CONNECTIONS

Meeting Scheduling

Empower exhibitors with Targeted Campaigns — a new way to generate high quality leads through targeted promotions and seamless meeting scheduling with your booth staff, right in the event app.

Topic Channels

Create a public, group discussion focused around any topic of your choice. Topic Channels make it easy for members to share opinions with like-minded individuals, and help you better understand what your members are interested in.

Direct Messaging

Facilitate one-on-one networking with in-app messaging. Members can easily initiate private conversations by sending and receiving messages, all without sharing personal information or leaving the app.
