

Telehealth Cart for Teleray Video Call System

Model No. PDI-TC19

Do you want to offer simple, portable telemedicine and video calls for your patients and senior living residents?

Take the Power of Teleray Wherever You Need It

The PDI Telehealth video call cart system with HIPAA-Compliant Teleray Software capability upholds PDI's high standards for safety, cost-effectiveness and functionality for healthcare.

- 1 Industry's Most Intuitive User Experience by Teleray
- 2 Integrated Camera/Mic for "no fuss" solution
- 3 Built for healthcare disinfection standards and infection control
- 4 Requires Internet signal (WIFI or ENET) and AC power. No dead batteries!

Teleray subscription sold separately by PDI.

Safe Communications that Improve the Patient Experience

Most Intuitive User Experience

- Easy-to-use touchscreen display for patient-to-clinician and patient-to-loved ones interactions on a safe UL-Listed hospital-grade device
- Senior residents or patients can easily video chat with staff, friends and family
- Easily configured for your facility needs so that healthcare providers can quickly initiate a Telehealth consult

Backed by Years of Expertise and Service

- PDI has sold over 1,000,000 patient tv displays since 1980
- Nautilus Medical, developer of Teleray, was named 2019 Most Advanced Medical Imaging Solution Provider by Insights Care magazine
- Nautilus serves over 70% of the top 50 US medical centers with over 2,000 locations
- Teleray offers free technical support. Teleray subscription sold separately.
