

These instructions are provided as a quick start for programming the PDI-P23LCDC television. The instructions assume you have installed the TV on the wall, correctly wired and connected a compatible pillow speaker, and have the programming remote control in hand. See the User's Manual for details.

Channel Setup

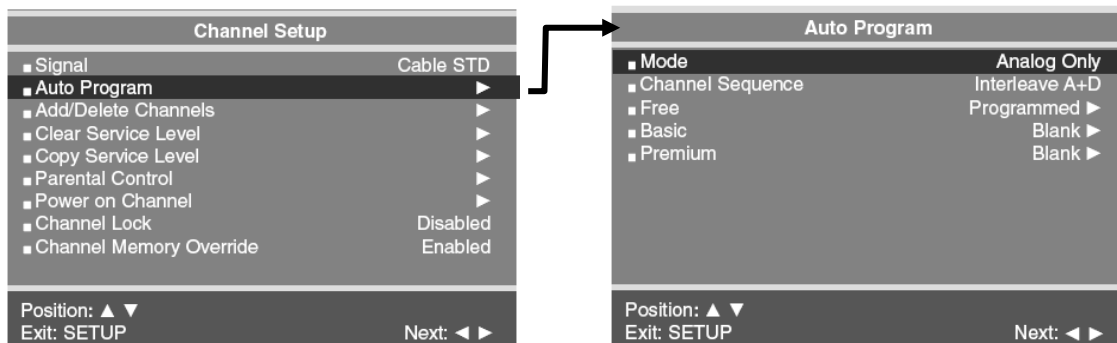

The TV offers three different programmable channel banks or Service Levels. Programming is only accomplished using the handheld remote control.

Signal

Four different tuning types are available depending upon the healthcare facilities signal style. Selection of the correct signal type is required for the TV to recognize all possible channels and before any channel programming can begin.

1. Press the SETUP button to display the SETUP MODE menu.
2. Press the CH▲ / CH▼ button to select Signal.
3. Press VOL◀ / VOL▶ to select Air, Cable STD, Cable IRC or Cable HRC. NOTE: Most hospitals use the Cable STD signal style.

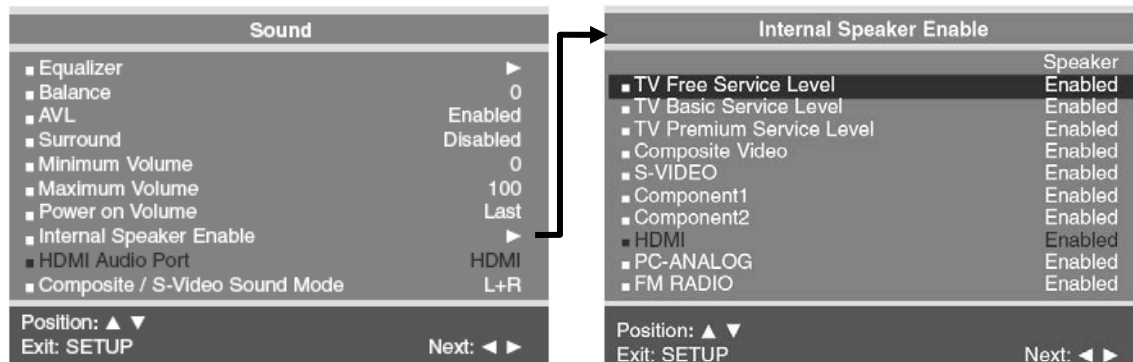

4. Press the CH▲ / CH▼ button to select Mode.
5. Press VOL◀ / VOL▶ to set the scope of channel scanning.
 Analog Only: TV searches for analog channels only.
 Digital Only: TV searched for digital channels only.
 Analog and Digital: TV searches for both analog and digital channels.

6. Press the CH▲ / CH▼ button to select the Channel Sequence menu item.
7. Press VOL◀ / VOL▶ to set the Channel Sequence in which the channels are displayed after searching.
 Interleave A+D: In the order of channel number regardless of the system.
 All A then D: Digital channels are displayed after all analog channels.
8. Press the CH▲ / CH▼ button to select the Service Level you wish to program. The menu displays the current programming status of each level as either Programmed or Blank. NOTE: A Programmed service level can also be re-programmed if desired.
9. Press the VOL▶ button to start auto programming.
10. A confirmation menu will appear before proceeding. Press either the CH▲ to start auto programming. Press CH▼ button to cancel the operation. The TV will now search all available channels. Auto programming may require several minutes to complete.
11. Press the SETUP button to return to normal TV viewing.

SOUND SETUP FOR PILLOW SPEAKER OPERATION

Internal Speaker Enable

The speaker's inside the TV's cabinet can be turned on or off for either different TV Service Level or Source modes. Note: Turn Off the TV's internal speaker to guarantee sound to an attached pillow speaker.

1. In the Sound menu, press CH▲ / CH▼ button to select the Internal Speaker Enable menu item.
2. Press the CH▲ / CH▼ button to select the desired Service Level(s) or Sources.
3. Press VOL◀ / VOL▶ to Disable.
4. Press the SETUP button to return to the preceding menu.

Minimum Volume

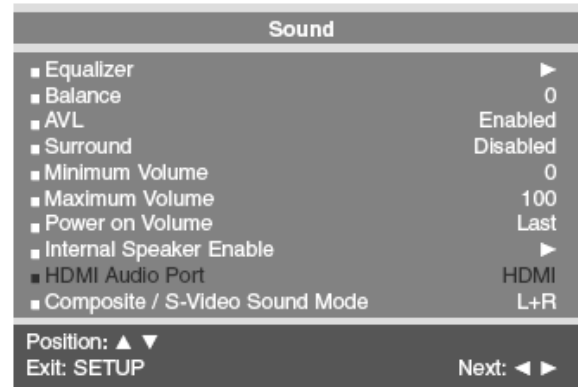

Sets the minimum volume level the TV can reach. Setting this to any value other than 0 guarantees that some level of sound will always be heard in the pillow speaker when the TV is operating.

1. In the Sound menu, press the CH▲ / CH▼ button to select Minimum Volume.
2. Press the VOL◀ / VOL▶ button to select your preferred minimum volume. A setting of 30% to 40% works well with most brands of pillow speakers.
3. Press the SETUP button to return to the preceding menu.

Power On Volume

Sets the initial volume the TV starts with upon powering on. Once the TV is on, the volume can be set to any allowable level.

1. In Sound menu, press the CH▲ / CH▼ button to select Power on Volume.
2. Press the VOL◀ / VOL▶ button to determine your preferred volume when the TV turns on. Setting the level to LAST causes the TV to remember the last volume level used by the TV prior to turning off.
3. Press the SETUP button to return to the preceding menu.

ADDITIONAL INSTRUCTIONS

Additional programming instructions can be found in the television's user manual. Please refer to document number PD196-099 for further details.
