

100 mm Mounting Bracket

This bracket can be attached to the 100mm VESA pattern mount on the rear of most small and mid sized LCD TV's. The mounting hole pattern has multiple 100mm spacings to allow the device to be attached to the set in the positions pictured below.

The mount holes are 3/16" in diameter and are sized for M4 hardware.

It is suggested that this mounting bracket be attached on top of the LCD TV mount rather than being sandwiched between the TV and the LCD TV mount.

200 mm Mounting Bracket

This bracket can be attached to the 200 mm VESA pattern mount on the rear of most larger sized LCD TVs. The mounting hole pattern has multiple 200 mm spacings to allow the device to be attached to the set in the positions pictured below. The mount holes are 3/16" in diameter and are sized for M6 hardware. It is suggested that this mounting bracket be attached on top of the LCD TV mount rather than being sandwiched between the TV and the LCD TV mount.
