dmcc.ae

An aerial photograph of a modern city skyline at dusk. The sky is a deep blue, and the city lights are beginning to glow. In the foreground, a multi-lane highway with a bridge spans across the frame. To the left, a tall, slender skyscraper with a pointed top is illuminated with blue lights. Other high-rise buildings of various architectural styles are scattered throughout the scene, some with lights on. The overall atmosphere is one of a bustling, modern urban environment.

Business
is evolving
fast

A photograph of three people in a modern office environment. A woman with curly hair, wearing a black and white striped shirt, is seated and looking at a laptop. Two men, one older and one younger, are standing behind her, both smiling and looking at the laptop screen. The background shows a blurred office space with wooden shelves and other people.

“Only 30% of today’s small businesses are in the cloud; by 2020 this is expected to be 80%”

“Entrepreneurs who don’t understand how cloud and SaaS technology can improve business will be at a sharp competitive disadvantage, no matter what your industry.”

Sabrina Parsons, CEO, Palo Alto Software

The amount of time required for business owners to manage the day-to-day running of their business is also constraining their ability to develop it.

“Over half – 57 percent – of the SME owners surveyed spent less than two hours per week on business activities that were not related to the day-to-day operation,”

James Scollay (MYOB report)

Imagine being able to run your business better by using specialized apps in the cloud.

What if those business apps were connected and workflows were automated, with all of your data shared between them.

How about being able to create custom dashboards so you could see what was going on in your business, enabling you to make real-time, informed and data-driven decisions.

Introducing DMCC Business Apps Manager

Automated

Connect your business apps to share data between them. Save time and effort on multiple points of data entry.

Business Intelligence

A Dashboard that shows you what you need to know to run your business, with real-time data from across your apps.

Consistency across your business functions

A single place to find all of your business critical apps, on the go, and secure.
Future proof your business, with the ability to switch apps as and when needed without losing all your data.

DMCC Business Apps Manager Selection

QuickBooks

QuickBooks Online is a powerful accounting system allowing you to manage customers, invoices, expenses and payroll for your employees.

gulfHR

gulfHR is a comprehensive human resources and payroll management system.

Appointedd

Appointedd is the ultimate online booking software allowing any business to take bookings, on any device, in any time zone.

Microsoft Office 365

Microsoft Office 365 enables productivity, on demand, through mobile, collaborative, and efficient work experiences.

Shopify

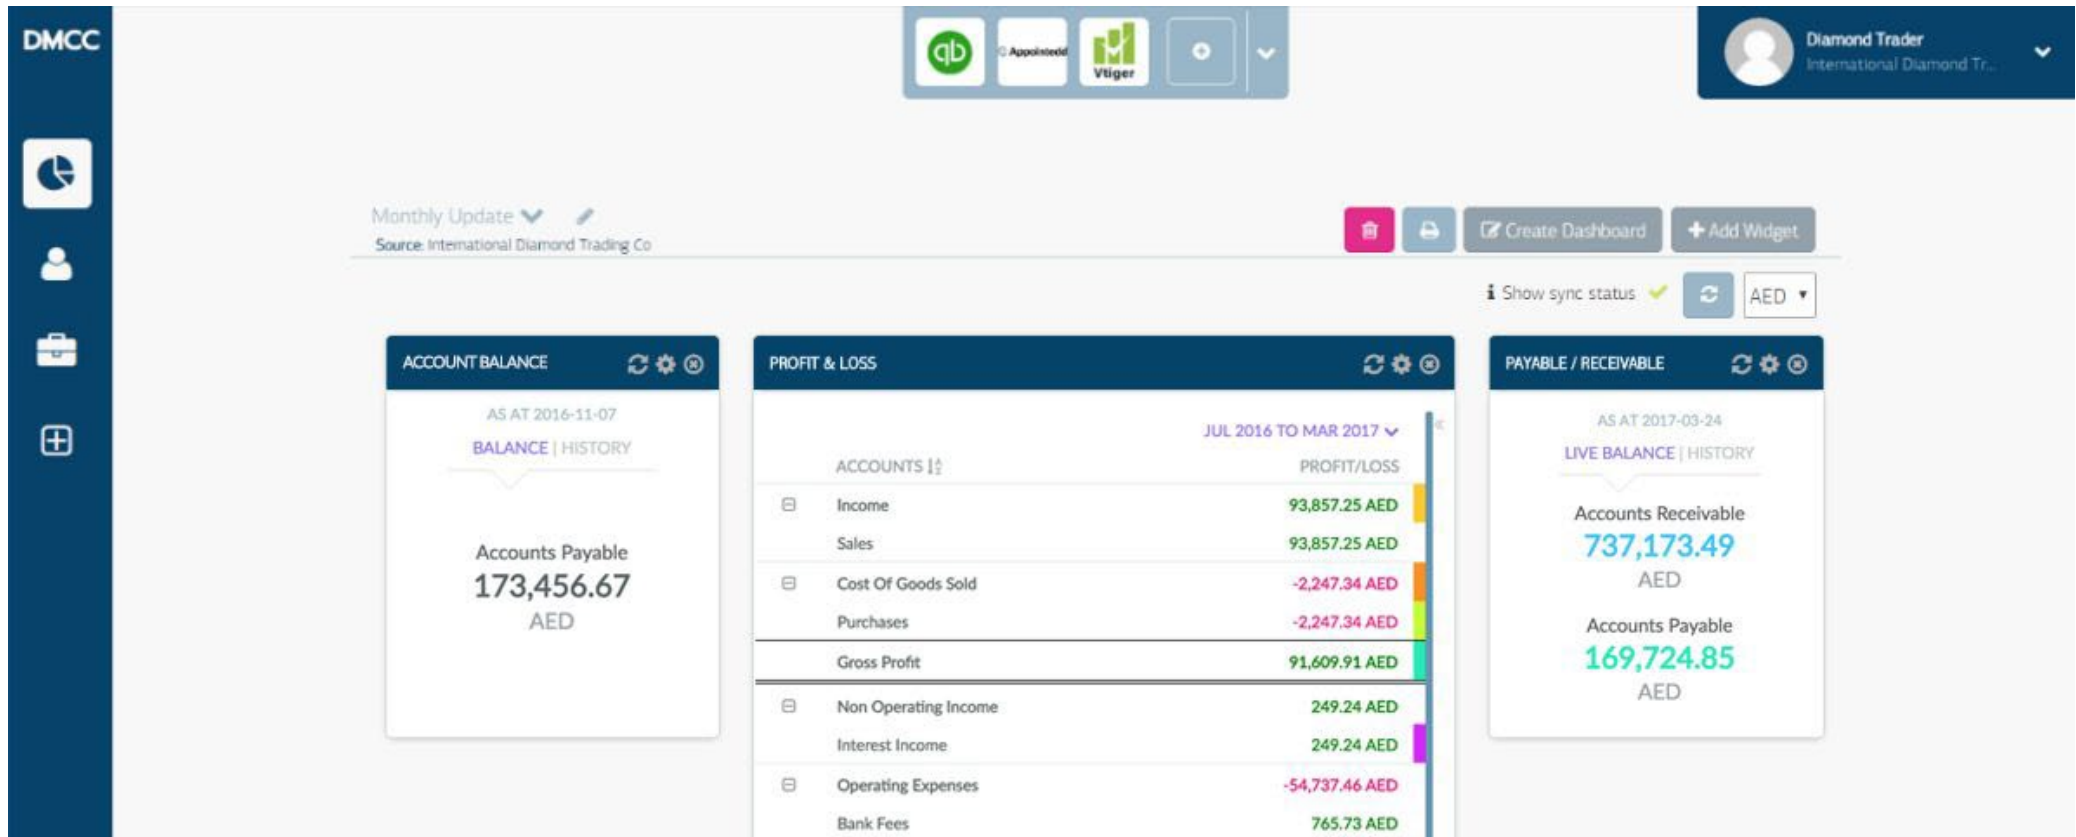

Shopify is an ecommerce platform that allows anyone to easily sell online, at a retail location, and everywhere in between.

vTiger

vTiger provides customer relationship management tools to support sales, marketing, and support teams with powerful services and insights.

DMCC Business Apps Manager Dashboard

DMCC Business Apps Manager provides a simple, user-friendly Dashboard where you can access your business applications, run your operations and monitor your whole business at a glance, using our advanced analytics. Powered by Maestrano, DMCC Business Apps Manager enables data sharing between applications by creating a central pool of data, so you can use the apps you are used to and get the same integration level as larger organisations.

Setting Up

Get set up on DMCC Business Apps

Setting Up

Getting Started Checklist

- ☐ Get set up on DMCC Business Apps Manager
- ☐ Find your business apps

Setting Up

Sign in and Connect an App

Let's walk through the process of adding an app to DMCC Business Apps Manager, in this case, QuickBooks.

Note: By the end of this process the app will be connected, but the data not yet shared. We will walk through how to sync data in the following section.

Setting Up

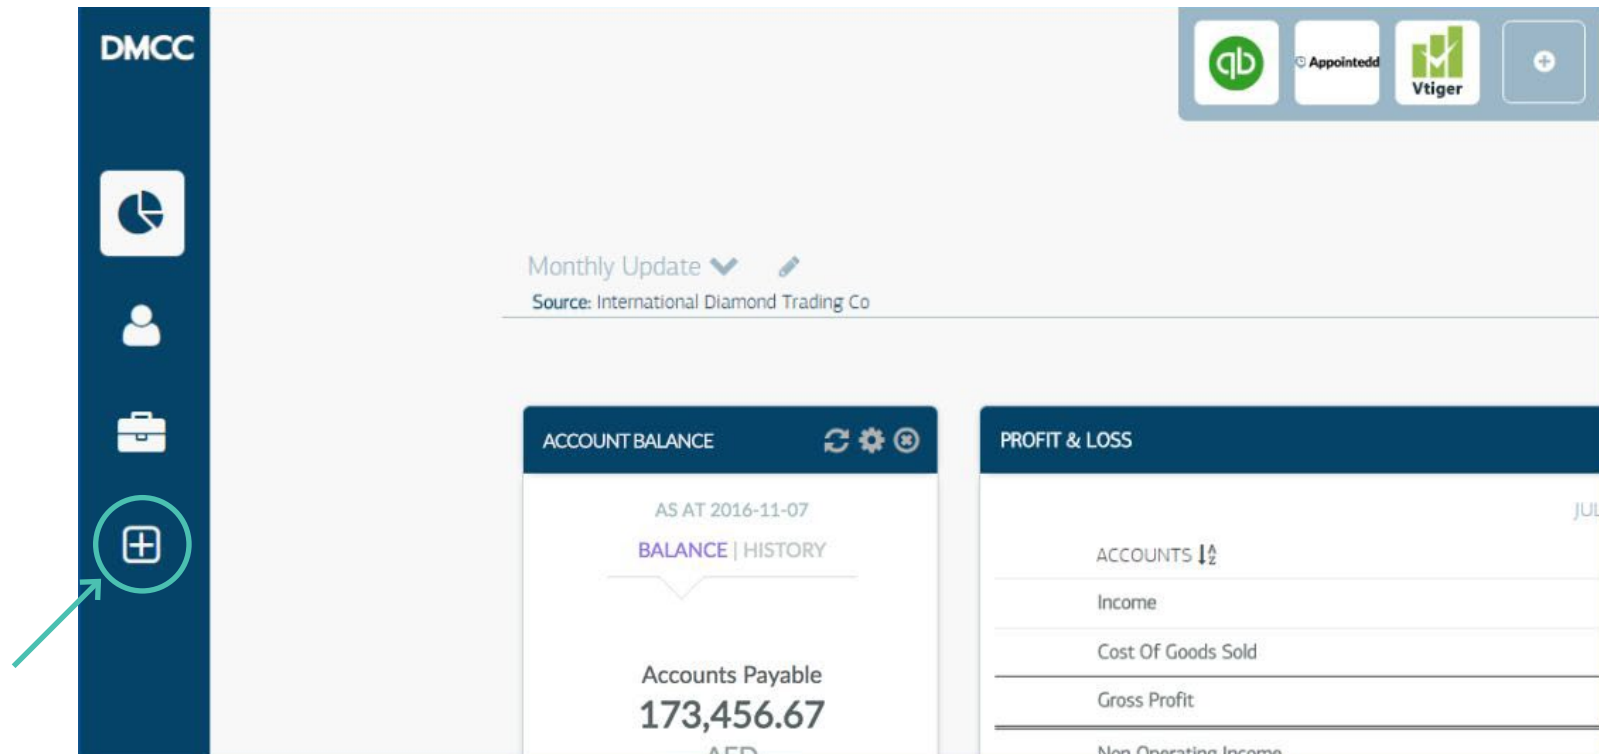

Sign in to DMCC Business Apps Manager

https://dmccbusinessapps.dmcc.ae/mnoe/auth/users/sign_in

Setting Up

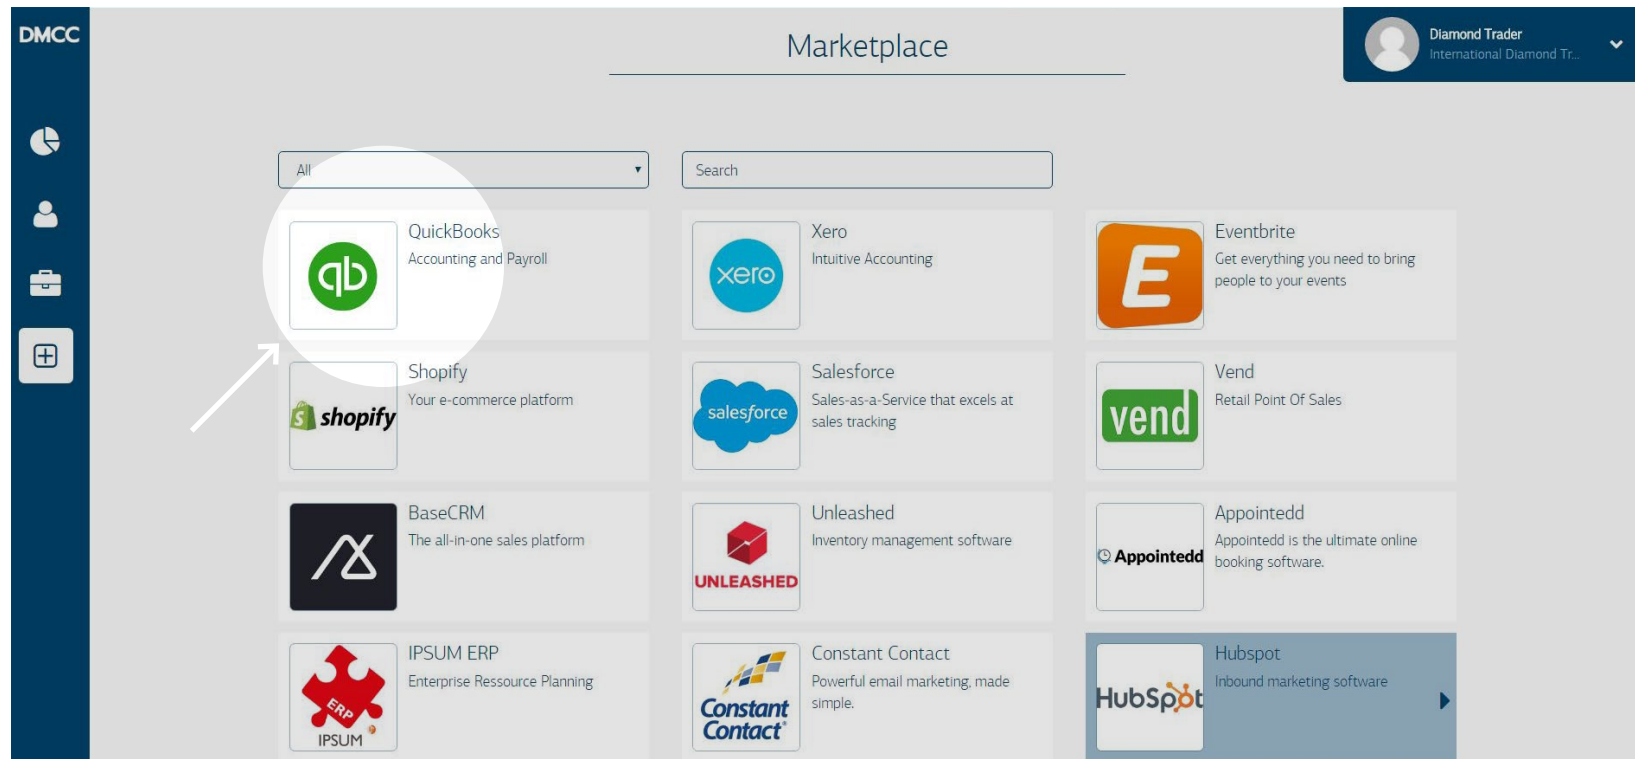

Find your Apps

- DMCC suggested business applications: vTiger , QuickBooks, gulfHR and Appointedd.
- Navigate to, and click on, the 'Marketplace' tab navigation bar on the left side to find your preferred apps.

Setting Up

Connecting to QuickBooks

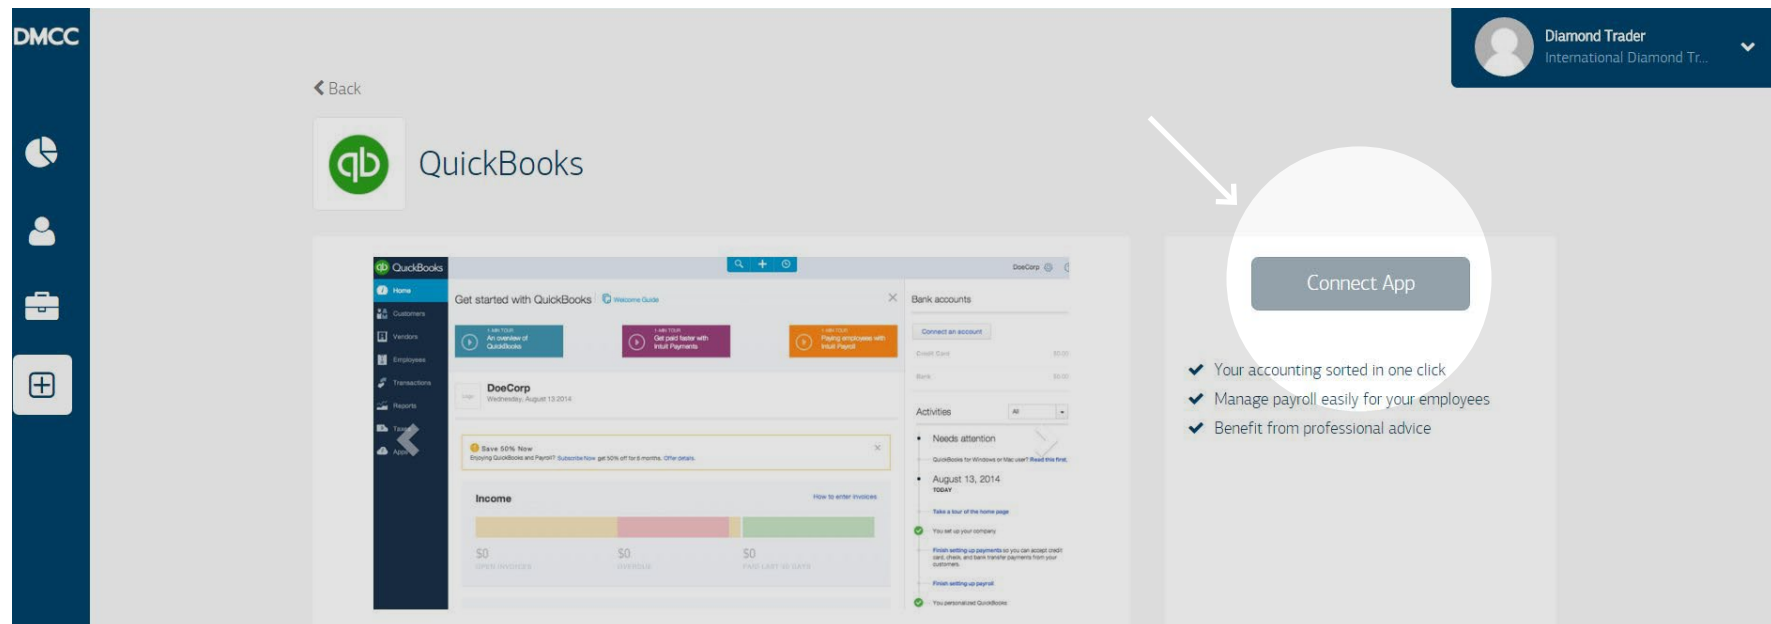

In this example, we will look at an accounting application, QuickBooks.

- In the Marketplace, you can filter by type of app, and/or search directly based on the name of the app.
- When you find your app, click on the appropriate box.

Setting Up

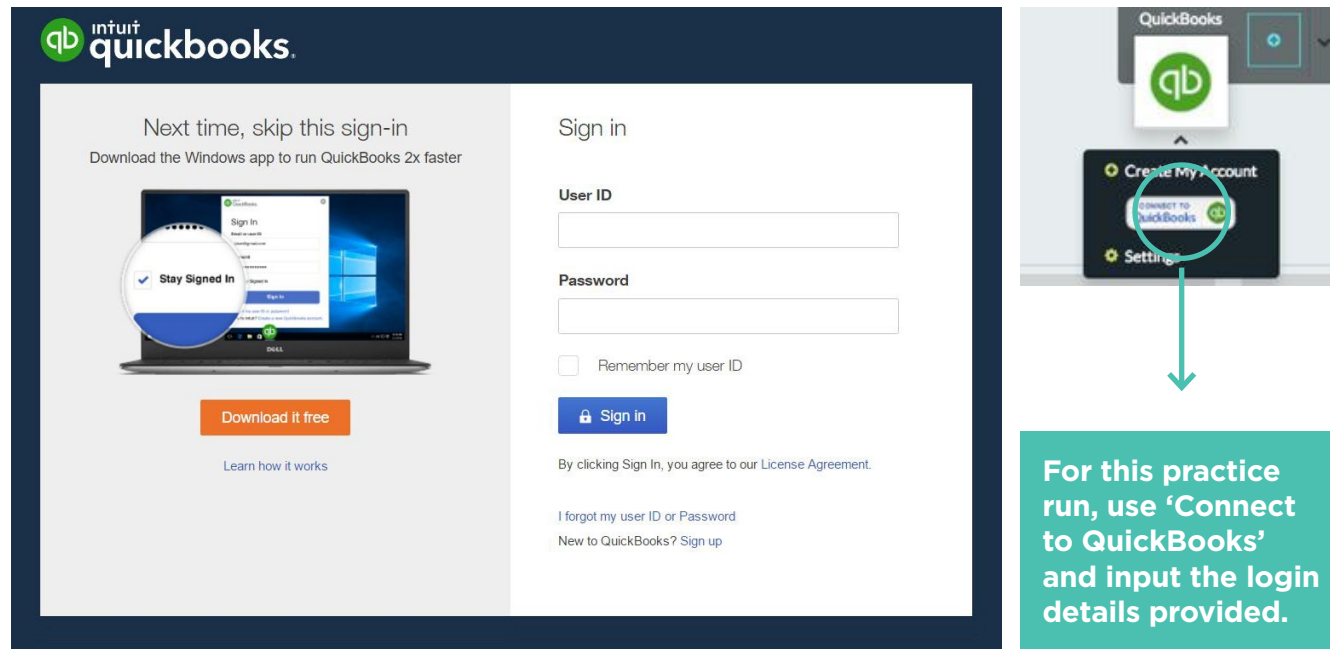

Connecting to QuickBooks

- This will take you to a page that houses further information about the selected app.
- Click 'Connect App'.

Setting Up

Connecting to QuickBooks

The image shows the Intuit QuickBooks sign-in page. On the left, there's a promotional banner for the Windows app with a 'Download it free' button. On the right, the 'Sign in' form has fields for 'User ID' and 'Password', a 'Remember my user ID' checkbox, and a 'Sign in' button. Below the button are links for 'I forgot my user ID or Password' and 'New to QuickBooks? Sign up'. To the right of the sign-in page is a diagram of the QuickBooks app menu. The 'Connect to QuickBooks' option is circled in red, with a red arrow pointing down to a red box containing the text: 'For this practice run, use 'Connect to QuickBooks' and input the login details provided.'

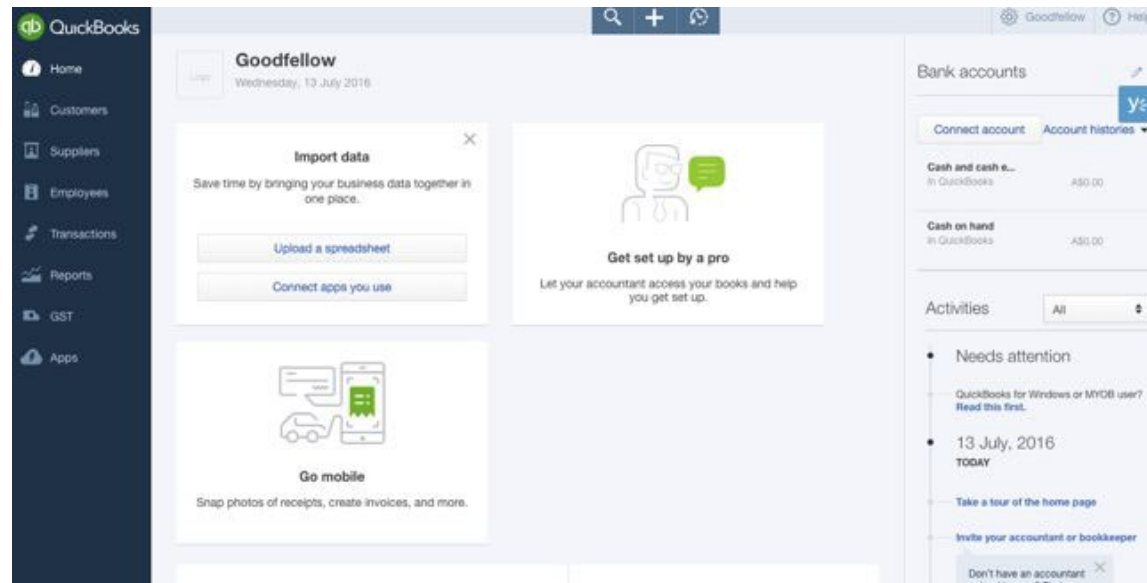

You will be redirected back to the DMCC Business Apps Manager Dashboard where QuickBooks has been added, and can be seen in the top application bar.

Hover over the QuickBooks app box to see a menu of options:

- Create My Account: click on this if you are new to QuickBooks, and would like to set up an account, learn more about it, or start a free trial.
- Connect to QuickBooks: click here to enter your existing QuickBooks login details.

Setting Up

Connecting to QuickBooks

Note: The sign-up experience may vary from app to app. Follow the in-app prompts to log in or sign up to each.

- Some apps offer free trial periods, some are completely free, and others require a subscription; make sure to choose the best option and app for you!
- If you already have an account, sign up with your existing login credentials to access your data and link up your app to DMCC Business Apps Manager

Follow this process of finding and logging into your apps as many times as you need to build a suite to help you run your business. Remember, if in doubt, use the navigation bar on the left side to find the Marketplace.

Setting Up

Connect your Business Apps

vTiger

DMCC

Business Apps

Appointedd

QuickBooks

To access Appointedd and vTiger, simply click on the launch button and you will access your app automatically.

Hint: follow the steps as shown in the previous section with QuickBooks.

Setting Up

Sync your Business Apps

The screenshot displays the DMCC Business Apps Manager interface. At the top center, a horizontal bar contains icons for three business apps: qb, Appointedd, and Vtiger. A green circle highlights this bar, and a green arrow points to the plus icon next to the Vtiger icon, indicating where to click to add more apps. The page also features a sidebar with navigation icons, a top bar with a user profile, and two main content areas: 'ACCOUNT BALANCE' and 'PROFIT & LOSS'.

ACCOUNT BALANCE

AS AT 2016-11-07

BALANCE | HISTORY

Accounts Payable
173,456.67
AED

PROFIT & LOSS

JUL 2016 TO MAR 2017

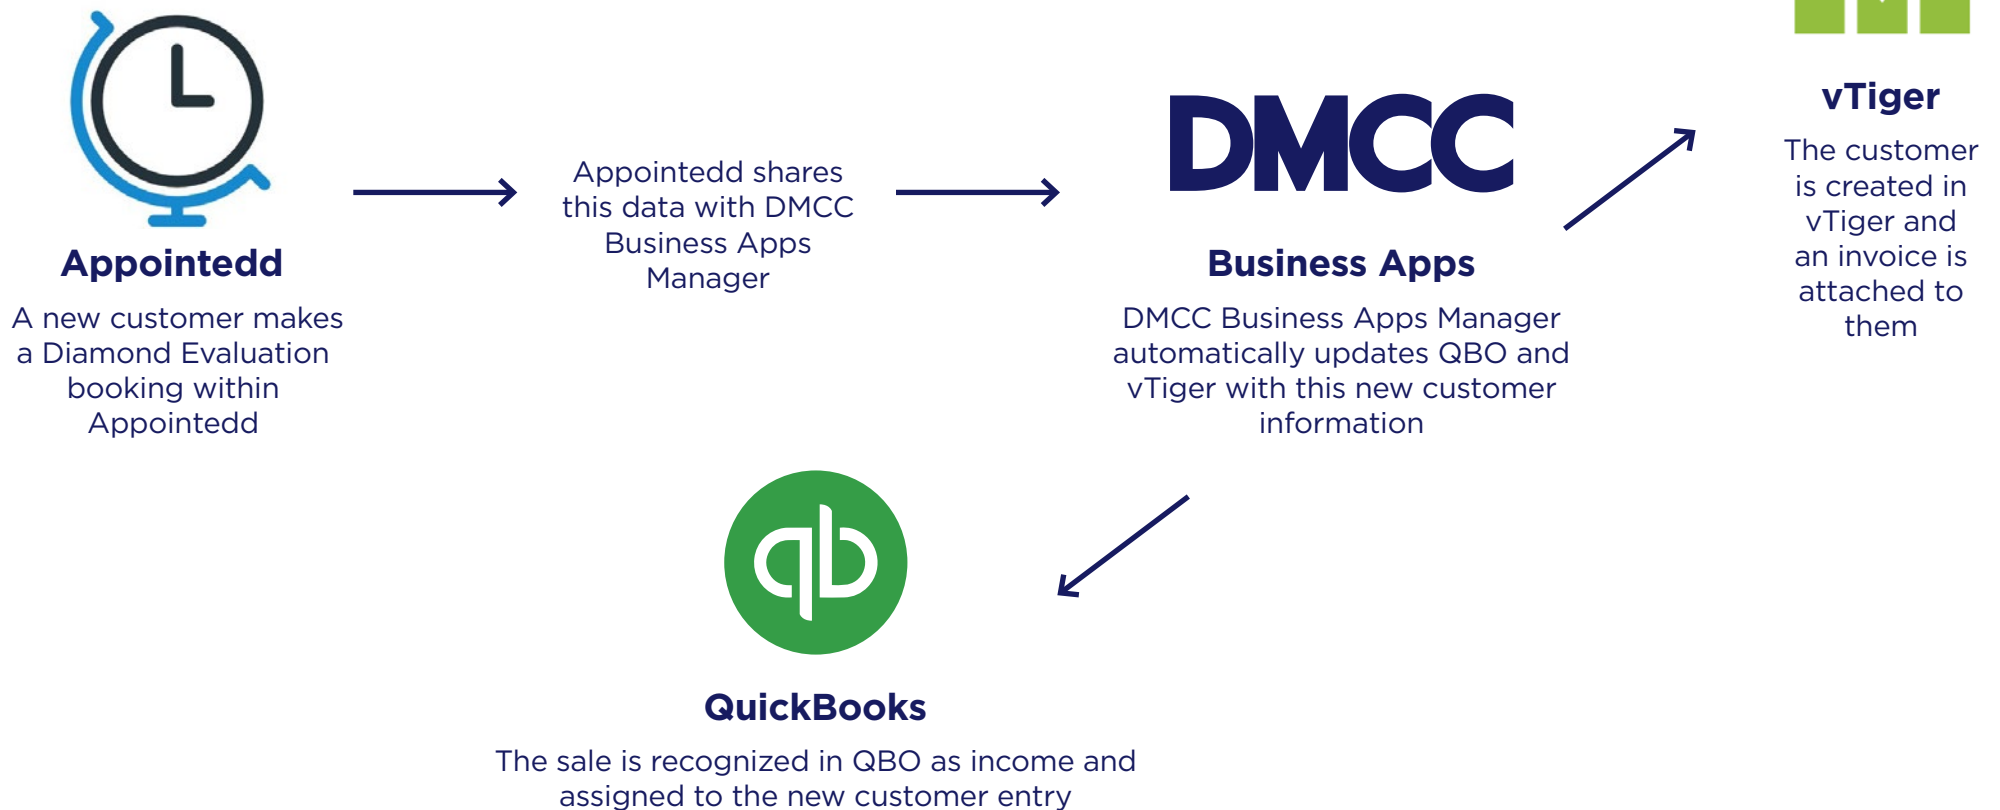

ACCOUNTS	PROFIT/LOSS
Income	93,857.25 AED
Sales	93,857.25 AED
Cost Of Goods Sold	-2,247.34 AED
Purchases	-2,247.34 AED
Gross Profit	91,609.91 AED
Non Operating Income	249.24 AED
Interest Income	249.24 AED
Operating Expenses	-54,737.46 AED
Bank Fees	765.73 AED

- You should now be able to see the three apps at the top center of the DMCC Business Apps Manager home page.
- Sign up to each app: click on each and select 'Launch' or the appropriate prompt to begin the login/sign-up flow
- After you have signed up to each app, please return to the DMCC Business Apps Manager page.

Setting Up

Check your Workflows

Now that you have connected and synced your apps, you can start to test how they work together. For example, our International Diamond Trading Company can see that new customer contact information is synced across its apps:

Setting Up

New Contact Scenario

Let's walk through a scenario where the data of a customer's booking, made in one app, is automatically synchronized with each of their linked applications.

Appointeddd

The screenshot shows the Appointeddd app interface for 'International Diamond Trading Co'. The top navigation bar includes 'APPOINTMENTS', 'CUSTOMERS', and 'TASKS'. A 'Weekly' calendar view is displayed, with a date picker set to 'Fri 26th Feb'. A modal form for adding a new customer is open, with fields for 'First name', 'Last name', 'Email Address', 'Mobile Number', and 'Phone Number'. A 'Create Booking' button is at the bottom right of the modal.

1) Make a 'consulting appointment' in Appointeddd for a new customer (Launch the Appointeddd app within DMCC Business Apps Manager. Navigate to Appointments --> Add. Fill out the booking and new customer information, following the booking prompts).

QuickBooks

The screenshot shows the QuickBooks app interface. The top navigation bar includes 'Customers', 'Invoices', 'Expenses', 'Reports', 'Tools', and 'Settings'. A 'New customer' button is in the top right. Below the navigation bar, there is a list of customers with columns for 'CUSTOMER', 'PHONE', and 'OPEN BALANCE'. The list includes customers like 'Almogal Soukhou', 'Anne Flanagan', and 'Anne Flanagan'.

2) Check in QuickBooks for the new customer (Launch the QuickBooks app within DMCC Business Apps Manager. Navigate to Customers. Look for the new customer's information).

Vtiger

The screenshot shows the Vtiger app interface. The top navigation bar includes 'Calendar', 'Leads', 'Organizations', 'Contacts', 'Opportunities', 'Products', 'Documents', 'Tickets', and 'All'. A 'Contacts List' sidebar is on the left. The main area shows a table of contacts with columns for 'First Name', 'Last Name', 'Title', 'Organization Name', and 'Primary Email'. The table lists contacts like 'Gail Berner', 'Mark Woodrow', 'Andy Woodrow', 'Andy Woodrow', 'Mark Woodrow', 'John Woodrow', and 'Shane Woodrow'.

3) Check in vTiger for the new customer (Launch the vTiger app within DMCC Business Apps Manager. Navigate to Contacts. Look for the new customer's information).

- ☐ Print a copy
- ☐ Add relevant widgets
- ☐ Print a copy

Business Intelligence

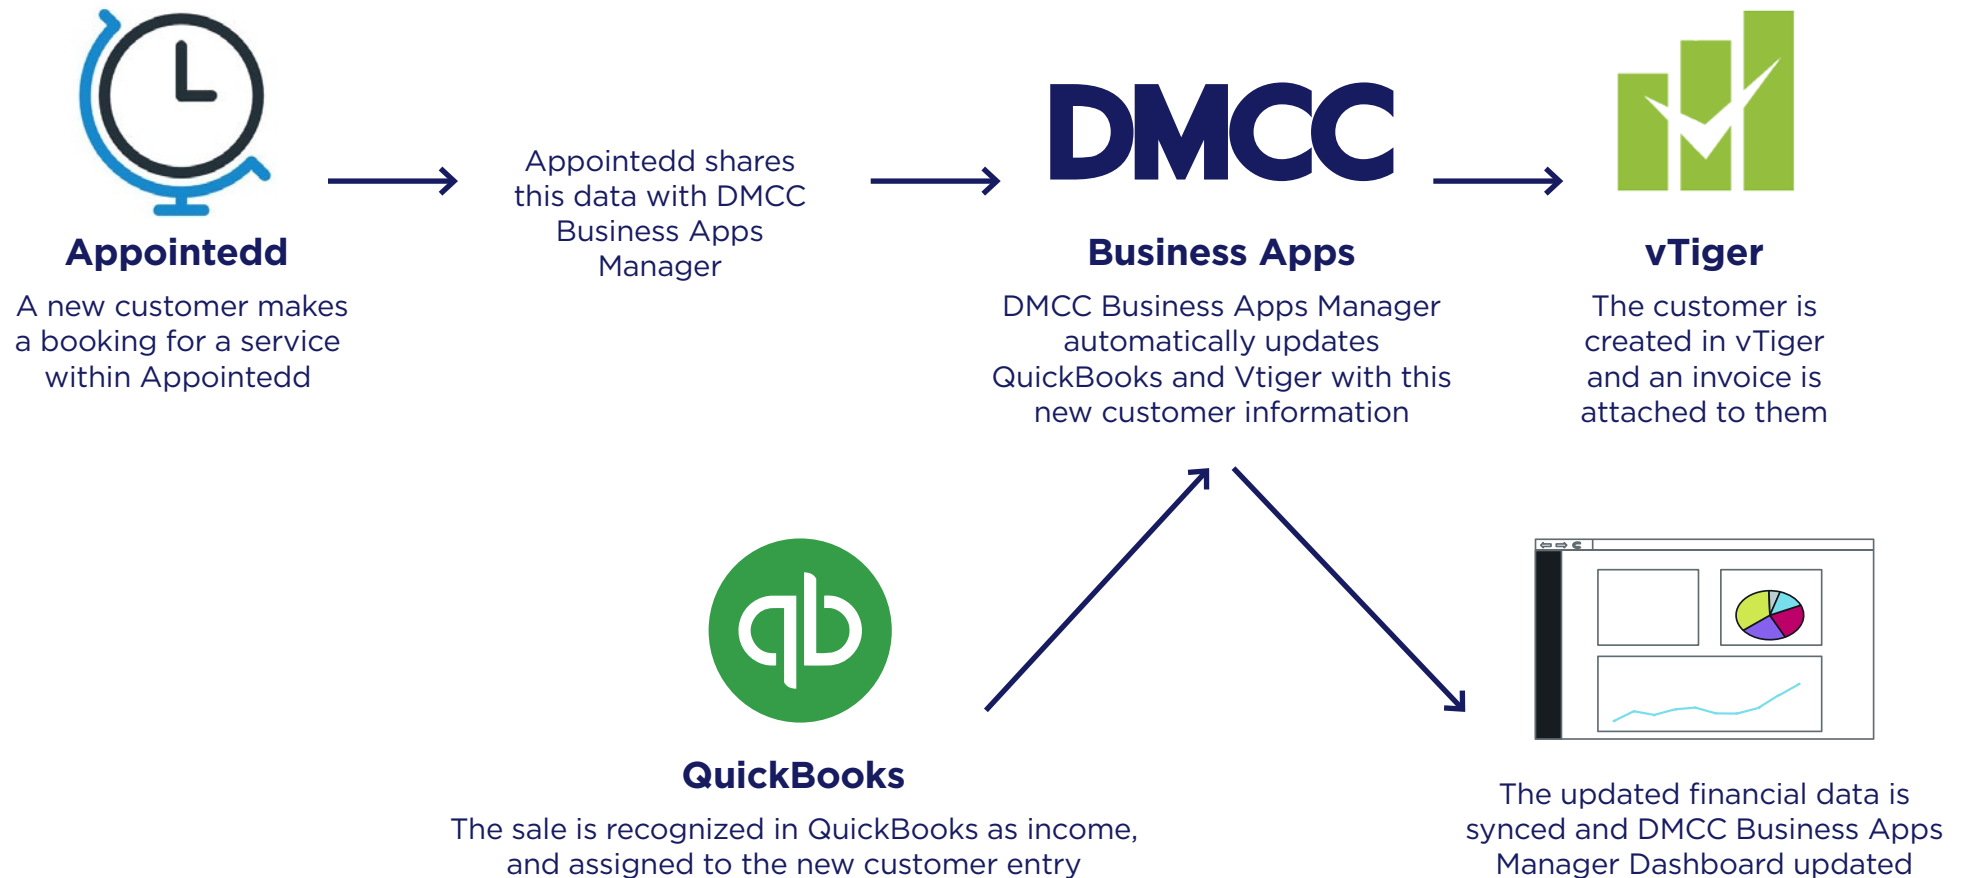

Identify Key Business Metrics

What information do you need to help you run your business, motivate your team, or make informed decisions?

Business Intelligence

Dashboard Scenario

Let's explore the whole flow again, based on the example of an International Diamond Trading Company. We will have a look at how the platform can generate Business Intelligence, in the form of a Dashboard, when a new customer makes a booking.

Business Intelligence

Create a Dashboard

The screenshot displays the DMCC dashboard interface. At the top, there's a header with the DMCC logo, a row of application icons (qb, Appointoid, Vtiger), and a user profile for 'Diamond Trader'. Below the header, a 'Monthly Update' status is shown. The main content area features two widgets: 'ACCOUNT BALANCE' and 'PROFIT & LOSS'. The 'ACCOUNT BALANCE' widget shows 'Accounts Payable' at 173,456.67 AED. The 'PROFIT & LOSS' widget shows a table of financial data for the period 'JUL 2016 TO MAR 2017'. A 'Create New Dashboard' modal is open in the foreground, with a text input field containing 'E.g: Cash Accounts Monitoring' and two buttons, 'Cancel' and 'Add', at the bottom right. A green arrow points to the 'Add' button.

Create New Dashboard

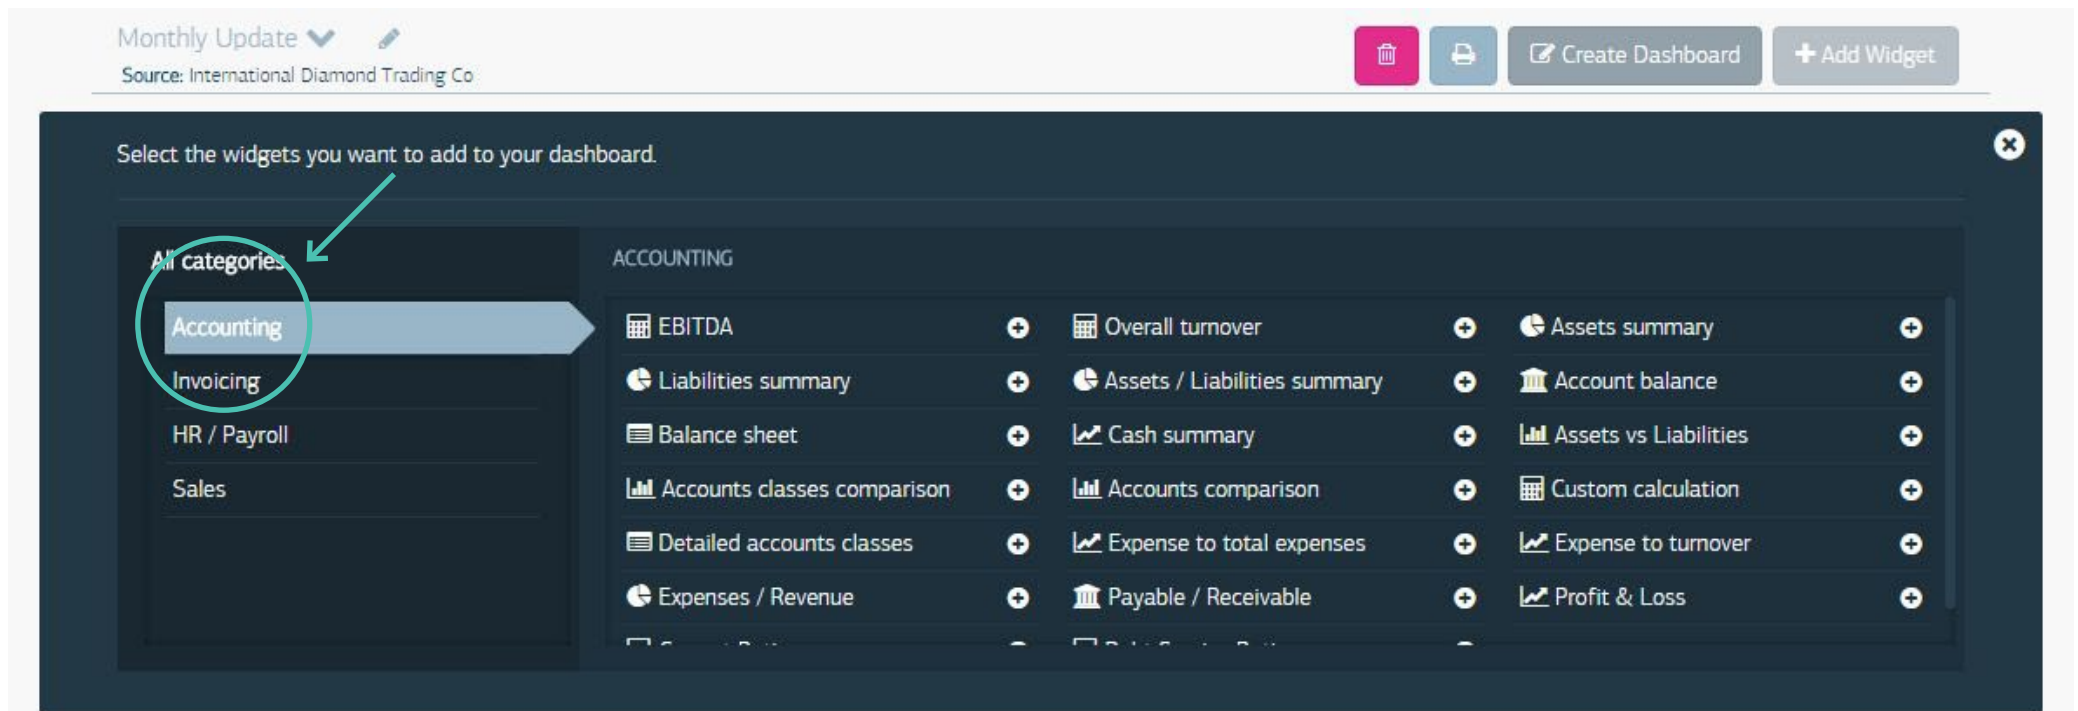

Name E.g: Cash Accounts Monitoring

Cancel Add

- Create a Dashboard – Click ‘Create Dashboard’, and choose a relevant name. In this case ‘Financial Dashboard’

Business Intelligence

Add a Widget

- Click 'Add Widget'
- Choose your category – in this example, we are most interested in accounting related content.
- Pick your widget – based on the metrics you need, pick your selected widgets and add to your Dashboard (hover over each for a more detailed description).

Business Intelligence

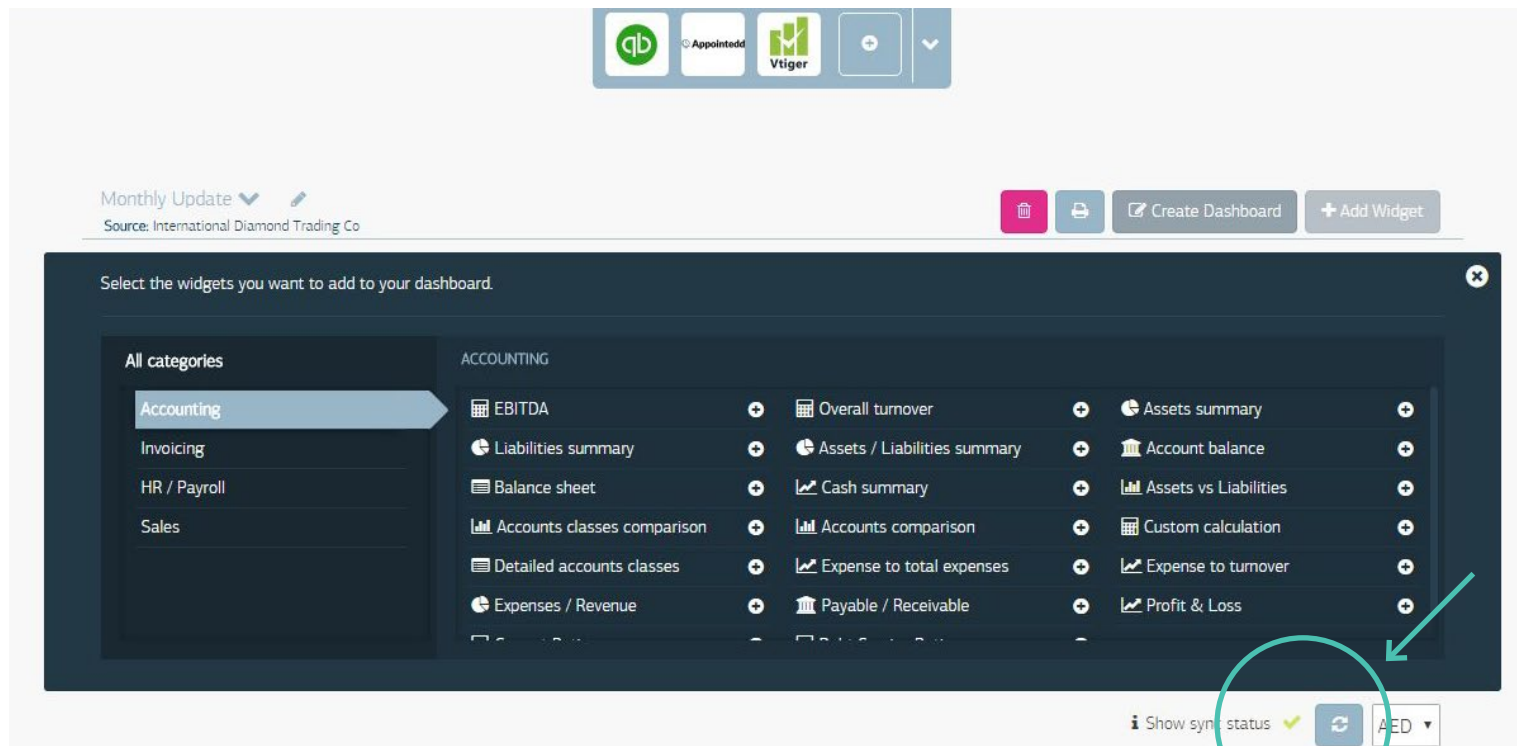

Choose your Widget/s

- This is your opportunity to build a Dashboard that is unique to your specific needs, be it updating the executive team on financials or motivating your sales team. The range of widgets available enables you to customize each report.
- In our example, we want to know about our monthly profitability. We can check this in a number of ways, but, for this example, we will choose 'Accounting' and click the 'Profit & Loss' widget.

Business Intelligence

Sync your Dashboard

- Click on 'Create a Dashboard'.
- Name your Dashboard and click 'Ok'
- Underneath, you will see a sync button; click on this to sync your apps.

Hint: The amount of data within your apps affects the speed of the initial sync. This can take between a few minutes to a few hours, so sit tight! If there is no information displayed in your Dashboard, check that there is data within your apps and that they are synced properly.

Business Intelligence

Generate your Dashboard

- Once you click on the widget, the Dashboard will automatically appear (scroll down the page).
- Here we can see the Profit & Loss information, drawn from the data in our apps.
- If you click on 'Net Profits', you can see a graphic representation of the data you need about the monthly profitability.

Business Intelligence

Print a Copy

The screenshot illustrates the process of printing a dashboard. At the top, a toolbar includes icons for 'qb', 'Appointedd', 'Vtiger', and a dropdown menu. Below this, a 'Monthly Update' section shows the source as 'International Diamond Trading Co'. A row of buttons includes a trash icon, a print icon, 'Create Dashboard', and 'Add Widget'. A modal window titled 'Select the widgets you want to add to your dashboard.' is open, displaying a list of categories on the left (Accounting, Invoicing, HR / Payroll, Sales) and a grid of accounting widgets on the right. A 'Print' button is visible in the top right of the modal. Overlaid on the modal is a 'Print' dialog box with the following options: 'Destination' set to 'Microsoft Print to PDF', 'Pages' set to 'All', 'Layout' set to 'Portrait', and 'Color' set to 'Color'. To the right of the modal, a preview of the printed dashboard is shown, titled 'Monthly Update' and displaying a list of accounting widgets.

- Click the 'Print' icon
- De-select any dashboards that you don't want to print
- Print your PDF. Use it to help drive your business decisions!

Benefits

Save time, money and increase
productivity

Benefits

1

Save Time and Increase Productivity

With automatic data synchronization across each app within the application bundle, you can spend more time running your business. No more time wasted on multiple points of data entry allows for an increase in employee productivity.

2

Easy Visa and Passport Management

The inclusion of enterprise grade HR management application, gulfHR, gives you complete control over managing employee visas, passports, and other important documentation.

3

Real-time Overview of Business Performance

The DMCC Business Apps Manager platform gives you an entire overview of your business performance and analytics, in real-time. From sales performance, accounts receivable, to important finance metrics.

4

Simple & Affordable Payment Structure

The DMCC Business Apps Manager platform features a simple and affordable monthly payment structure. Know exactly what you need to pay for the platform and associated platforms.

Pricing

Simple and easy pricing
schedule

Pricing

The DMCC Business Apps Manager platform offers a 30-day free trial. This allows enough time for your business to test out the reporting features, data synchronization capability, and use of applications.
