

# Children's Speech Pathology

Our specialised children's speech therapist works specifically with children under school age who are experiencing speech-related problems.

## Areas we can address include:

- The use and understanding of language
- Speaking clearly
- Fluency of speech (stuttering)
- Voice
- Speech sounds (articulation)
- Comprehension difficulties.

The scope of our services are tailored to your child's needs, from assessment advice to specific treatment or training for parents.

We see parent involvement as extremely important, with sessions conducted both in individual and group settings.

This service is available in Lilydale and Upwey.

**For more information, call Inspiro on 9738 8801.**

This service is supported by the Commonwealth and Victorian Governments.
