

29 May – 2 June 2017
in Russia

Success factor production

See first-hand how state-of-the-art Russian companies optimally plan and flexibly manage their meat operations and how they reduce costs

Company tours:

- Cherkizovo in Moscow
- AgroPromKomplektacija in Kursk
- Zarechnoe in Voronezh

Dear Reader,

The Russian meat industry has encountered a radical extent of modernization and efficiency in the past years. New plants have been built equipped with the very latest technologies.

Because after all, in Russia they don't do things by halves. The consequence: Russian meat companies are now among the leading global players in the production of meat in terms of efficiency, size and innovation. Learn about best practices and witness CSB technologies first hand. But Russia also has plenty of potential as a market as well. Get to know this exciting growth market. CSB will give you a behind-the-scenes look at the market and state-of-the-art production processes at the Meat Business Days.

Kind regards

-

AgroPromKomplektaciya

www.apkholding.ru

The corporate group „AgroPromkomplektaciya” is one of the leading agricultural-industrial organizations of the Russian Federation and was established in 1988. The vertically integrated group with its closed production cycle specializes in pig breeding and milk production as well as in the production and sales of products and has been subject to highly dynamic growth for years. Today, 7,000 members of staff are employed in the 55 structural units.

Employees: > 1.200

Performance:

- Production capacity: 1.8 million pigs/year or 185,000 tons of pork meat per year
- Slaughter capacity: 300 pigs/h with the option to double performance
- Cutting performance 150 pigs/h

Special features:

- Power complex for own production of electricity and heat energy, which eliminates exhausts into the atmosphere.
- State-of-the-art treatment plants to minimize the environmental burden of the company

Highlights:

- The IT solution CSB-System for the management of all production processes and production systems
- Robotized processing and cutting of carcasses
- Automation and robot technology in intralogistics
- Use of FACTORY ERP® for the comprehensive management of special industry processes
- Use of EBS and EDI solutions by CSB
- Thanks to CSB, the company can calculate operative product costs (cost price) and analyze all key financial figures

Cherkizovo

www.cherkizovo.com

Is Russia's largest public agricultural holding. The group belongs to the three leading companies in the fields of poultry, pork and meat products and is the country's largest animal feed producer. The „Cherkizovo” group has 8 poultry farms with a full production cycle and an overall capacity of some 550,000 tons per year (live weight), 15 state-of-the-art pig farms with a total capacity of 200,000 tons per year (live weight), 6 meat processing operations with an overall capacity of 190,000 tons per year and 9 feed production facilities. In 2015, the group produced more than 825,000 tons of meat products and achieved a sales volume of 77 billion rubles

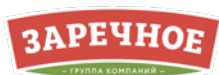

Sales volume: 77 billion rubles

Performance: Production capacity: 350 tons of meat products per day

Product range: More than 300 articles

Highlights:

- Use of FACTORY ERP® at 5 meat production facilities of the group
- Centralized control of all processes
- Comprehensive management and control of complex processes in the manufacture of sausage and delicatessen products
- High transparency and accuracy of all processes

Zarechnoe
www.zarechnoe.ru

The ZARECHNOE Group is a group of vertically integrated agricultural companies consisting of several business units, including the full production of high-quality beef with unparalleled traceability. The company is a leader in the beef market in Russia and realizes the full production cycle. The cycle encompasses breeding (Black Angus), crop cultivation, fattening operations and meat processing. The modern production facility in Voronezh meets all Russian, US and EU standards. ZARECHNOE is equipped with state-of-the-art production lines, including innovative production systems. Slaughter takes place either on the basis of traditional methods or in compliance with ritual-relevant guidelines

Employees: 250

Foundation: 2008

Performance:

- Slaughter capacity: 30 head of cattle/h with the option to increase output to 50 head of cattle/h
- Production capacity: up to 150 tons/shift or 40,000 tons of beef/year
- 8 own breeding facilities with 60,000 Black Angus cattle

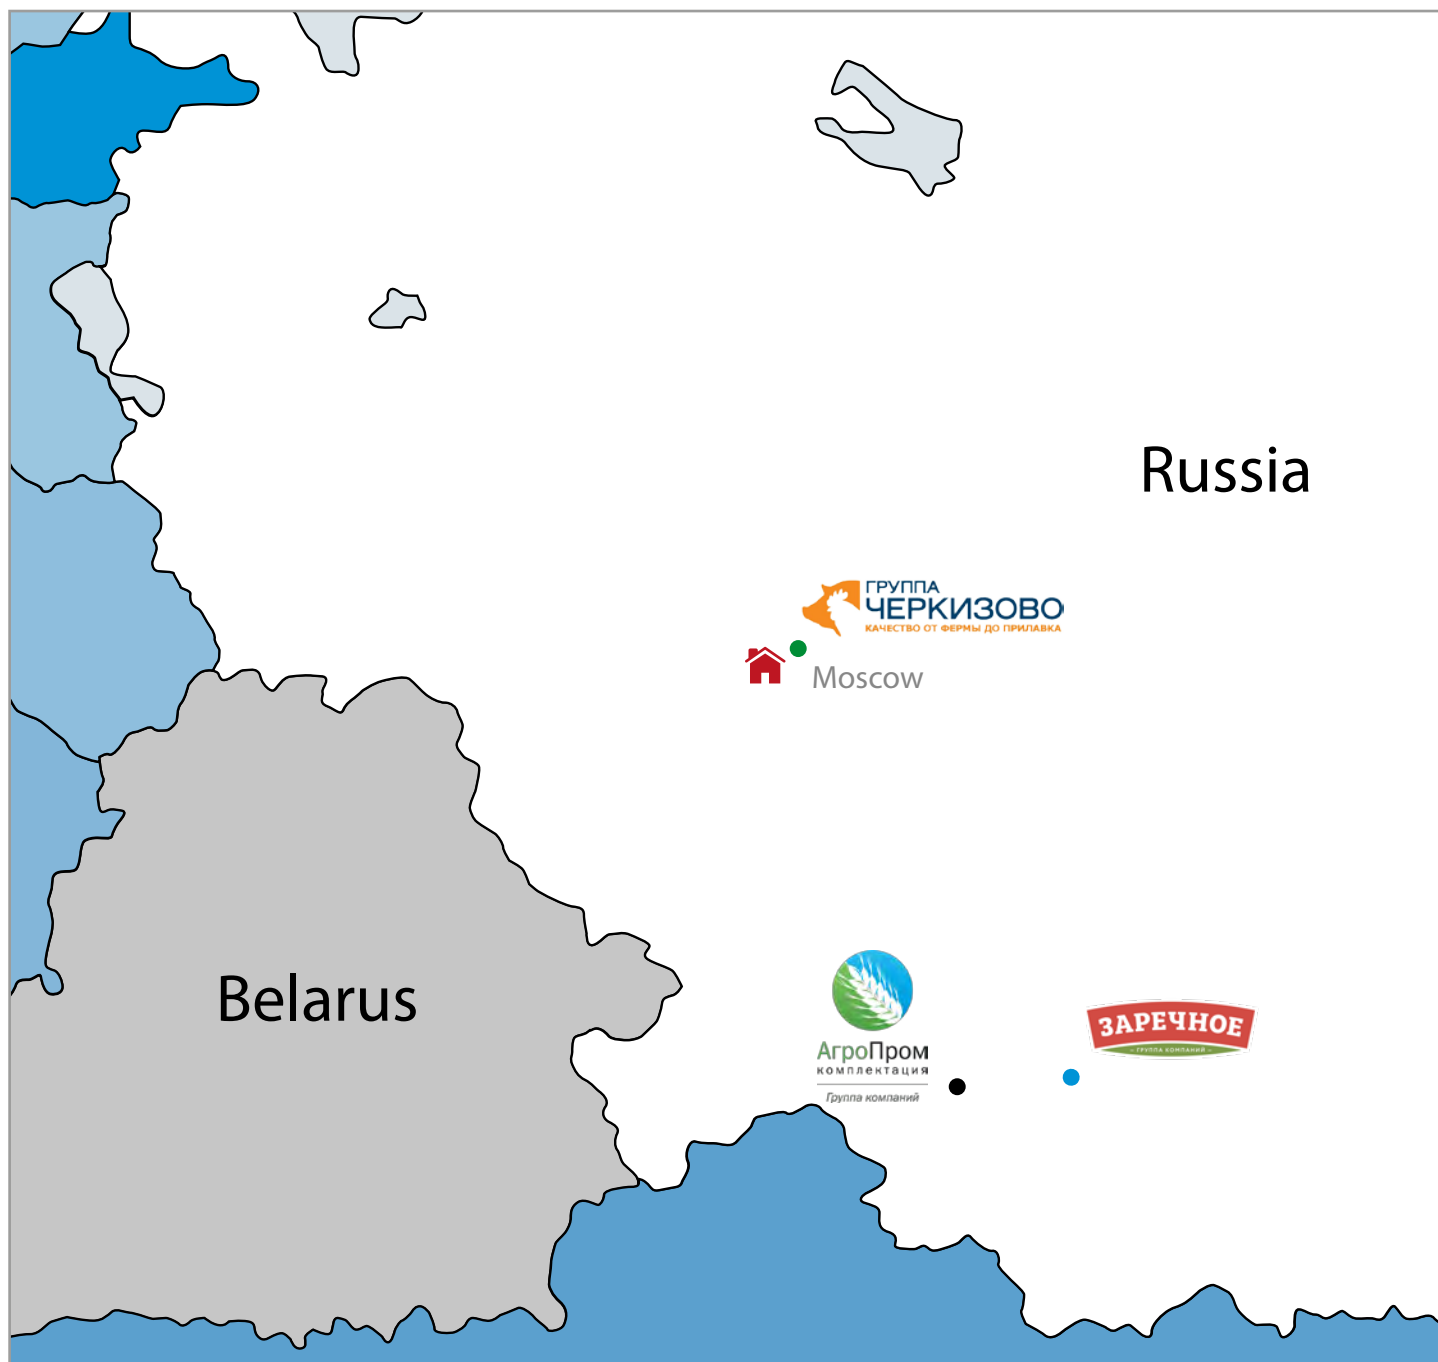

Highlights:

- Traceability of all products incl. proof of origin
- Control of all logistics processes
- Automated production processes
- Robot-driven storage
- Ritual slaughter
