Isolite Systems Speeds Shipping & Delivery in Canada

*Canadian Dentists Can Now Benefit from Award-Winning Dental Isolation
With Less Hassle and Delivery Times as Short as Two Days*

SANTA BARBARA, Calif. – June 12, 2013 – Isolite Systems announced today a new distribution solution for Canada that will help the company service its Canadian customers faster and more efficiently.

Isolite Systems began offering its award-winning dental isolation systems for sale in Canada in December of 2012. Proper dental isolation is important to dental procedures because it minimizes contamination and increases clinical success. The company's Isolite and Isodry systems are proven, easier-to-use, alternatives to traditional forms of dental isolation, such as the rubber dam and manual suction and retraction. The systems aid in dental procedures by improving patient management and giving dental professionals unprecedented control of the oral environment: keeping the patient mouth open and tongue retracted, improving visibility, continuously evacuating fluids and controlling oral humidity.

Isolite Systems has partnered with Trans Canada Distribution to ensure that customers receive their orders in the most effective and efficient manner possible. By shipping from a warehouse in Mississauga, Ontario, most customers can now receive their goods within two to four days, depending upon their location.

"Our new distribution and logistics solution will help us dramatically reduce shipping times so that we can be more responsive to our customers' needs," said Raleigh Guice, Senior Director of Call Center Sales and Customer Service. "We are 100% committed to providing customer service that is equal to our award-winning dental isolation systems."

Trans Canada Distribution is a provider of GMP compliant warehousing and distribution services with extensive experience in serving the dental industry and warehousing and distributing products regulated by Health Canada.

"Previously we were shipping to Canada from our headquarters in Santa Barbara, and that meant that all shipments needed to clear customs. Now, with our new distribution solution, we eliminate the delays and extra brokerage fees associated with shipping into Canada because we can now ship to customers directly from Trans Canada Distribution's Mississauga facility," added Adam Ontiveros, Senior Manager of Production.

Isolite Systems' direct sales to Canada continue to grow and Canadian dental professionals will find knowledgeable Sales and Customer Service Professionals at their service via the company's toll-free number: 800-560-6066.

About Isolite Systems

Isolite Systems is committed to transcending the limitations of existing dental technology with innovative products that help dental professionals work more productively with less stress and fatigue. Isolite dental isolation is in use at leading dental practices, dental schools, and military and public health facilities. It has received significant industry recognition for its contribution to the advancement of dentistry including being named one of the "50 Greatest Game-Changers in Dentistry," winning eight consecutive Dentaltown Magazine "Townie Choice Awards," and receiving the DrBicuspid.com "Dental Excellence Award for Best New Instrument." Isolite dental isolation technology has been favorably reviewed by leading independent evaluators.
