

6 Steps to Compliance with Hazardous Waste Regulations

Identify 

1

Identify each item of hazardous waste generated by your hospital

Count 

2

Calculate the total weight of all hazardous waste that falls under the regulations of the RCRA

Notify 

3

Notify the EPA or applicable state agency of your production of hazardous waste

Manage 

4

Manage the hazardous waste your hospital generates in accordance with the regulations for your generator category

Transport 

5

Track the hazardous waste from your hospital's location to the waste management facility that will ultimately dispose of it

Recycle, Treat, Dispose 

6

Treat and dispose of hazardous waste according to regulations

To learn more about how to be compliant through each of the six steps, download our Compliance Handbook.
