

Why Leidos Health Oncology Services?

Results You Can Count On

Your physicians and patients count on you to bring the oncology team's focus on delivering quality cancer care to the forefront. In the same way, you can depend on Leidos Health to provide you with highly qualified resources to assist with your Oncology EMR and imaging implementations for both medical and radiation oncology. When your oncology or IS resources are faced with new projects or simply need assistance dealing with existing challenges inherent to projects such as these, resources from Leidos Health can bridge the gap between project success and project overruns. Leidos Health can provide high quality resources for system upgrades, the implementation of additional application modules, Meaningful Use and MACRA assistance, new hardware installations, short term staffing solutions, and more. Keep your projects moving so your cancer center can continue to provide the highest level of service that your patients and your clinical community have come to expect.

Breadth of Experience

Leidos Health has a variety of experienced oncology consultants, including system analysts, application analysts, project managers, and oncology nurses.

LEIDOS HEALTH ONCOLOGY SUPPORT

- ▶ Elekta
- ▶ Varian
- ▶ GE Healthcare
- ▶ Epic
- ▶ Cerner™
- ▶ Nuance®
- ▶ M*Modal

Oncology System and Application Analysts

Our oncology analysts average over 20 years of experience with Elekta and Varian, as well as all of the major EMR systems. They offer to you:

- ▶ Practical experience working in medical and radiation oncology departments
- ▶ Insight into various configurations and approaches, best practices, and lessons learned for each engagement
- ▶ Experience with newer and complex configuration requirements, such as, Meaningful Use survivorship, MACRA, billing, patient navigation, building regimens or care plans, and a spectrum of middleware solutions including Patient Portals
- ▶ Expertise in the testing phase of your projects at both the application level and with bringing up the back-end into production
- ▶ Experience with HL7 interfaces and the specific needs of oncology departments
- ▶ The creation of procedures and processes to help drive change management and improve EMR adoption
- ▶ Educational and training sessions at every level

Oncology Project Managers

Effective project management is critical to the success of any project. That is why our experienced oncology project managers offer you:

- ▶ Excellent organizational skills and proficiency in PMI-aligned project methodologies
- ▶ Experience in managing large complex projects in large complex organizations
- ▶ Outstanding communication skills
- ▶ Depth and breadth of knowledge with regard to Oncology workflows

Our project managers average over 20 years of experience working on oncology-specific projects, from software and hardware upgrades to interfacing with hospital systems.

Technology Design and Implementation

The network architecture and hardware supporting your Oncology system is critical. A correctly chosen and configured technology platform that meets vendor specifications can reduce downtimes and improve performance. With an improperly designed and maintained system, patient safety can be at risk and your care team can become frustrated, resulting in negative impacts to your workflow, throughput, and profits. There are many components necessary to support an Oncology system and Leidos has the skill and experience to help you design, implement and maintain such a critical system for your organization.

Oncology Department Managers

Our oncology experts not only provide staff, system, and vendor management assistance, but they are also experienced in assisting and leading the development and establishment of oncology strategies and setting the direction of oncology departments. With an average of more than 20 years in managing oncology departments, our managers have served as interim managers and directors in freestanding sites, large healthcare systems and have also worked with large national systems as well as community hospitals.
