Anderson Healthcare and Leidos Health Collaborate on MEDITECH ExpansE Planning and Implementation

JULY 12, 2018

Anderson Healthcare (Maryville, IL) has selected Leidos Health as their partner for certified consulting advisory, implementation, and training expertise as they embark on their Level 3 MEDITECH ExpansE implementation program. The program will consolidate Anderson's non-standard, multi-facility EHR deployment to an integrated, standardized, and interoperable enterprise environment leveraging the latest advancements from MEDITECH's ExpansE portfolio. The implementation is now underway, with Go-Live expected in Q4 2019.

Leidos' Foundational Leadership Workshop Sets the Course for ExpansE Success

Ensuring leadership is closely aligned and has a clear vision of desired future state outcomes is one of the key factors governing ExpansE implementation success. Leveraging experience and proprietary strategic planning tools, Leidos Health has worked with the Anderson executive team to build the foundational framework for creating their vision and future state outcomes. To date, the executive leadership team has established:

- ▶ A robust **Program Vision and Mission Statement** that sets the pace for teams
- ▶ Pervasive **Program Branding** to drive team motivation and participation
- ▶ A defined and monitored **Governance Model** to ensure predictive outcomes
- ▶ A **Communication and Change Management Strategy** to ensure alignment
- ▶ A **Training Strategy** designed for consistency
- ▶ An internal **Staffing Model** to cover anticipated work loads

As a cornerstone for all of Leidos Health's MEDITECH ExpansE implementations, the Foundational Leadership Workshop is a key Leidos differentiator that focuses on alignment across the leadership team that ultimately owns the success of their implementation. Anderson's leadership team is fully engaged and has well-positioned their organization for success.

"Leidos' approach to engaging and empowering our leadership team during the pre-implementation planning has really helped position our organization for success as we kick-off the implementation phase," said Mike Ward, CIO at Anderson Healthcare.

"The Foundational Leadership Work Session helped established our program foundation and set our implementation strategy. It is so important to have leadership involved from the beginning and all be on the same page," said Mike Marshall, CFO/Program Executive Sponsor at Anderson Healthcare

Having helped hundreds of healthcare organizations plan, implement, and optimize their MEDITECH systems, Leidos Health helps organizations get the most from their system investment. As an Expanse Certified Consulting firm, Leidos Health has deep expertise and proven experience to help customers achieve optimal outcomes with their Expanse implementation. Through a collaborative approach, Leidos Health is committed to client success and brings robust tools, methodology, and deliverables to help organizations meet their goals.

About Leidos Health

Leidos Health is a leading healthcare IT consulting firm with deep clinical and technical expertise to support our customers in selecting, implementing, and optimizing information technology investments.
