

THE PRINTERS THAT ARE EQUALLY OBSESSED.

## PHOTOGRAPHERS SHOOT USING THE MARK OF QUALITY

---

Highly regarded among professional photographers, Canon L-Series lenses are distinguished by a bold red ring around the outer barrel.

By combining the use of a Canon camera and an imagePROGRAF PRO Series printer, photographers are able to achieve a unique, input-to-output solution known as Crystal-fidelity.

From professional photographers to graphic designers, they openly share what they need and want in a printer, like stunning, black-and-white prints with deep blacks, detailed gradations, and a wide color gamut that accurately reproduces even the most difficult colors.

Introducing the Canon imagePROGRAF PRO-4000 and PRO-2000 professional, large-format printers. The 44" and 24"-wide models offer an 11-Color plus Chroma Optimizer ink system that does it all. The best printers Canon has ever engineered, distinguished by a bold red line.

## LUCIA PRO INK SYSTEM

---

The LUCIA PRO 11-Color plus Chroma Optimizer ink system can satisfy the demands of the most critical photographer or graphic artist. A dense droplet placement provides a broad color gamut and the Chroma Optimizer provides improved gloss uniformity for superb color and anti-bronzing. Incredibly accurate color reproduction, outstanding image clarity, and enhanced detail in darker areas help distinguish each print. On fine art papers, deep black density renders even the finest shadow detail for a print that becomes a work of art.

## WIDE COLOR GAMUT

The microencapsulated LUCIA PRO ink set is tightly arranged on the paper with each print head pass—creating a wide color gamut. The newly formulated Blue and Magenta inks work to render brilliant color when printing vibrant landscapes while the Black inks can capture the finest detail in the darkest areas of your images bringing them to light.

UP TO 32,256,000

INK DROPLETS PER SECOND  
ARE PLACED ON THE PAPER.

## NEWLY DEVELOPED PRINT HEAD

At the heart of the imagePROGRAF PRO-4000 and PRO-2000 printers is a 1.28"-wide print head with 18,432 nozzles. Using one print head as opposed to two, like previous imagePROGRAF 12-color models, the new PRO Series is able to achieve faster print speeds.

### ANTI-CLOGGING TECHNOLOGY

Ink ejection conditions are precisely checked with sensors, so if a clog is detected, another nozzle automatically provides backup. In addition to helping to prevent wasted prints due to clogging, this also helps reduce the frequency of nozzle cleaning required.

### NO SWITCHING OF BLACK INKS

On other brands of printers, switching from Matte Black to Photo Black consumes a significant amount of ink and time. The PRO Series is designed to work seamlessly when changing paper types. Matte Black and Photo Black inks have their own dedicated nozzles, so no switching is necessary. You can print on fine art paper then glossy paper with no worries, no changes, and no waste.

### MULTI-SENSOR

All PRO Series devices include a built-in multi-sensor to help ensure color consistency, not only from one print to the next, but also from one PRO Series device to another. With the included Device Management Console Software, calibrate and monitor up to 50 PRO Series devices with ease on both Canon and non-Canon media, ensuring highly consistent color.

### COLOR CALIBRATION

Producing the correct color is paramount when printing high-quality, archival work. The built-in Color Calibration function uses a multi-sensor to read color density and automatically calibrate the printer, so that the last print looks as stunning as the first.

## ADVANCED MEDIA HANDLING

---

### MULTIFUNCTION ROLL SYSTEM

The optional Multifunction Roll System can be used in two different ways. It can enable you to load a second roll of a different media type and size at the same time so that you can automatically switch from printing on matte to gloss paper without interrupting your workflow, or the unit can be operator-configured as a bi-directional Take-up unit.

### EFFORTLESS MEDIA LOADING

Loading media on a Canon large-format printer has never been easier than on the imagePROGRAF PRO Series printers. Simply set the roll holder in the printer, rotate the roll holder handles, and let the media automatically feed into the printer. No need to touch the paper, helping to decrease the risk of creasing and blemishes.

## ENGINEERED OBSESSED

---

### L-COA PRO

This new high-precision control engine performs the high-speed processing of massive amounts of image data, generates the printing data, and controls the optimal ink layout for the purpose of achieving high-resolution prints.

### UNIBODY DESIGN

The newly engineered unibody structure provides a strong platform for stable print head scanning, resulting in precise ink droplet placement. The perfect combination of speed and high-quality printing is achieved with this new design.

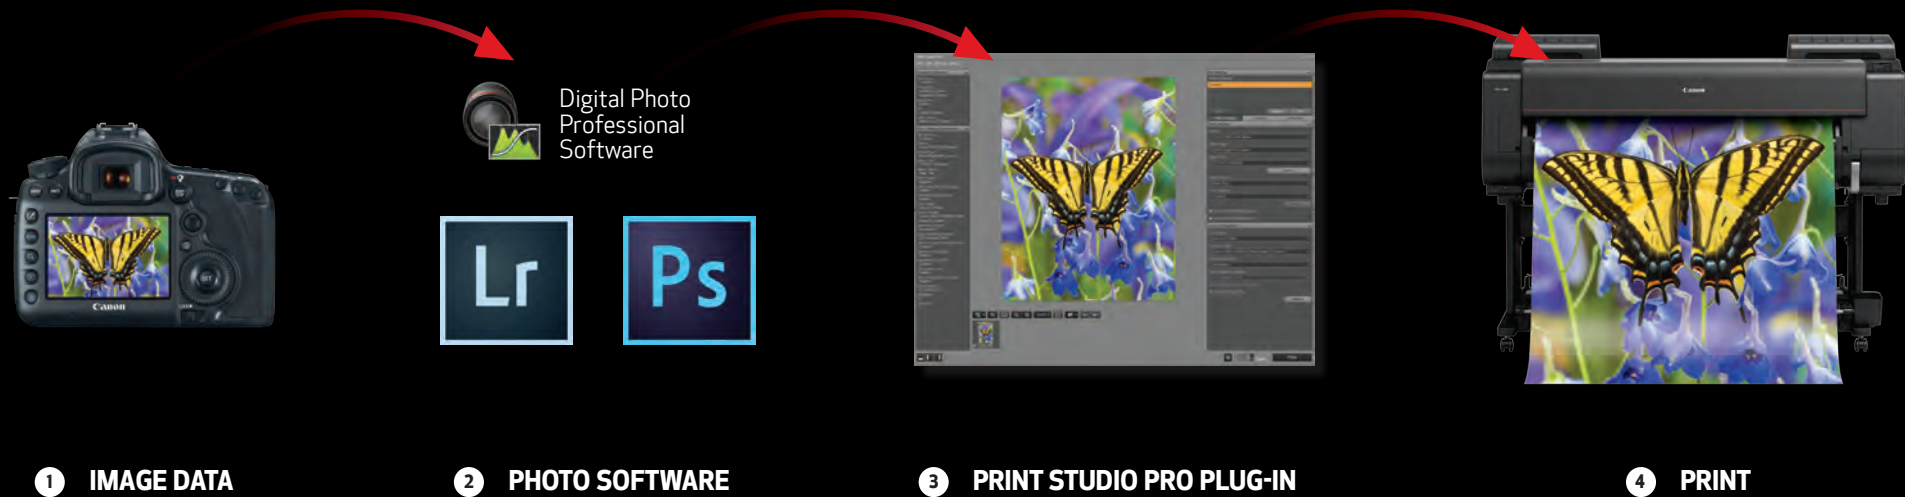

### HIGH-CAPACITY INK TANKS

Available in 160 ml, 330 ml, and 700 ml ink tanks, you're now given the flexibility to purchase ink based on your printing needs. 700 ml Photo Black ink tanks can be purchased for those often printing monochrome images and 160 ml Magenta ink tanks for the occasional sunset image, giving the power to purchase ink based on the color frequency at which images are printed.

### SUB-INK TANK SYSTEM

The Sub-Ink Tank System works to remove all of the ink in the tank before having to replace it, helping to eliminate any wasted ink. The empty tanks can also be replaced on the fly, without stopping the printer. This is extremely useful during your long print jobs.

## CANON WORKFLOW

## PRINT STUDIO PRO

Creating Canon large-format prints is now easier with the introduction of Print Studio Pro. This software offers features that help streamline your printing workflow. Compatible with Canon Digital Photo Professional, Adobe® Photoshop, and Adobe Lightroom, Print Studio Pro offers versatility never before seen with Canon large-format printing.

### Key features include:

- 16-bit printing workflow
- Large preview screen
- Import multiple images and make batch edits that apply to all
- Create “Favorites” settings
- Print history
- Soft proofing
- Edit tone curves and import/export
- Contrast Reproduction
- Gallery Wrap
- Ability to print multiple-up images

## PRINTER MANAGEMENT SOLUTIONS

---

### Wi-Fi® CONNECTIVITY

Stay Connected. A first for the imagePROGRAF large-format printers, Wi-Fi connectivity is now standard with the new PRO Series printers.

### ACCOUNTING MANAGER

In today's printing environment, it's more important than ever to understand how much each print job is costing your business. Both Mac® and Microsoft® compatible, Accounting Manager serves as a powerful feature, used for accurately managing your print costs. With Accounting Manager, you can track how much ink and paper is being consumed with printing on up to 50 printers!

### QUICK UTILITY TOOLBOX

Quick Utility Toolbox is home to where all of the Canon PRO Series printer software and tools can be accessed.

### DIRECT USB DRIVE PRINTING

PDF and JPEG files can be directly printed on the imagePROGRAF PRO-4000 and PRO-2000 from a USB thumb drive. Simply input the thumb drive into the USB port on the printer, preview the image on the operation panel, and print! Fast and easy printing without the use of a computer.

### DEVICE MANAGEMENT CONSOLE

The Device Management Console software, ideal for fleet management, lets you perform color calibrations remotely. This software lets you monitor the printer status of up to 50 units from any location in the world, be notified via e-mail when an error has occurred, or check the amount of ink left in the printers without ever having to leave the comfort of your desk.
