Capture
OnTheGo
OL™ Software

Carry your forms...
NOT the paper
Corporate documents have never been so light and easy to take around.

Design

Design your html forms and use data from your various systems.

Connect

ERP · CRM · DATA

Distribute them to people on the field.

Enrich documents with data, geolocation (GPS), handwriting & photos

Forms are viewed and completed

Validate before sending.

Capture

Capture and store data as soon as it arrives & trigger any process.

Send data back to your systems securely

Trigger processes, archive and exchange

Capture OnTheGo the «must have» solution for Field Force Automation

A comprehensive toolkit that gives you full control to access all your documents from start to finish. Once signed-off, they are sent back to the system immediately.

Attachments such as photos, hand-written annotations, geo-location or any information that is relevant to the file can also be easily added.

Offline mode
What happens when there's no Internet connection?

Outgoing documents and forms can be filled in and queued for submission until Internet access is available on your device, and sent when you're back online.

Secure document sharing

Your documents and forms ready for download are pushed to the mobile application and will remain available in the user's library even when offline.

Users and user groups can be easily managed so they only have access to what they are entitled to, and what is relevant for them to see.

With Capture OnTheGo, documents can also be sorted and searched by client name or document category.

Features

Mobile application

- Offline library
- Annotations possible on PDFs
- HTML Form and offline data
  validation

Wireless printing

Web Admin Panel

- Home screen to manage repository,
  users, user groups, documents and
  other parameters

- White label to enable application
  branding

**Workflows automation, to and
from the Mobile application with
PlanetPress**

**File sending with multi-media
content**

Online and offline modes

Icons to visualise documents' status

OL™ Care

- Online training
- Updates & upgrades
- Technical support

Multi-media content
Submit forms with additional information such as
signatures, pictures, hand-written annotations and geo-
location coordinates.

Infinite action sequences
Thanks to its workflow automation feature, subsequent
actions and processes such as company systems update
(e.g.: CRM) or invoicing can be triggered by submitting a
form.

Preserved bandwidth
Because only input data needs to be transferred, you
save a lot of bandwidth, ultimately allowing high-speed
data transfer.
