Fax Hosted Service

Secure fax hosted service for sending and receiving faxes with email.

How Hosted Fax Services Can Help You:

- No fax server to manage or maintain
- Reduce cost by eliminating fax lines connected to the fax machines
- Ability to keep existing fax numbers by porting to the fax hosted service
- Eliminate busy signals: faxes are sent and received immediately
- Easy to use web portal with visibility to the fax usage
- Secure TLS
- Live world class technical support located in Massachusetts
- Helps meet HIPAA, SOX, FERPA, and other compliancy concerns
- No committed contract

On Premises Fax Server

Reliable, scaleable and secure on premises enterprise fax server solution for companies with large volumes of fax traffic.

How Biscom's on premises fax server can help you

- Less time managing since user management and authentication is directly integrated with Active Directory
- Reduce cost by eliminating fax machines and phone lines connecting to MFP's
- Easy to train users since it works with Outlook, Office 365, Gmail, SharePoint, content and document management solutions, and other software applications
- Maintain one true enterprise solution that handles every fax need
- Meets security requirements with encryption of data at rest with complete audit trail
- Real-time monitoring with automatic alerts
- Helps meet HIPAA, SOX, FERPA, and other compliancy concerns with Job tracking and reporting
- Live experienced technical service and support located in Massachusetts

Hybrid

Use both the on premises fax server solution and the fax hosted service to meet high availability and disaster recovery requirements without any manual processes.

Secure File Transfer solution

Web-based solution replacing insecure FTP and email to send and share files all while being easy for end users to operate without IT involvement and no file size limitation.

How can Secure File Transfer help you?

- Gives users the ability to send and share large and confidential files without involving IT
- Reduces your Exchange server mailbox size by re-routing attachments through the Secure File Transfer solution
- Helps meet compliance requirements including HIPAA, SOX, FERPA, etc. (FIPS 140-2 certification for encryption at rest)
- Replaces less secure methods, such as FTP, USB drives, email, etc. giving you peace of mind knowing you are securing important and valuable corporate data
- Easy to set up and manage integrating with directory services
- Provides detailed reports on all activity and provides an auditor/compliance role
- Deploys as an on premise or private cloud solution
- Live world class experienced technical support located in Massachusetts

Verosync

Verosync combines the simple sharing features that users want with the security that IT needs. Sync your files and folders to give you access to all your data without having to think about how to move them from device to device.

How can Verosync help you?

- Allows people to collaborate with others inside and outside the organization without getting the IT department involved
- Less time managing and administrating since Verosync leverages Active Directory and LDAP for real –time user administration and role management
- Simple and Intuitive to use
- A complete audit trail for a compliancy officer
- Files are protected with FIPS 140-2 certified, AES 256-bit encryption.
- Support for MobileIron's enterprise mobility management solution for BYOD policies
