Giving Shape to Ideas

Advanced Document Workflow for Professionals.

professional

 **Dispatcher**  
Phoenix **Professional**

# Productivity.

Dispatcher Phoenix Professional is a powerful document workflow application that includes all of the standard functionality of Dispatcher Phoenix Foundations along with additional features, such as file parsing, advanced job routing, and connecting to document management systems. With its important support for image processing, routing, and printing tasks, Dispatcher Phoenix Professional is powerful enough to handle any business workflow. And its user-friendly, graphical Workflow Builder tool makes creating workflows both simple and fast. Whether it's sending documents to key recipients, customizing complex print jobs, or indexing documents and folder browsing from the MFP panel, Dispatcher Phoenix Professional can handle all of your document processing needs, improving workplace productivity and saving your business both time and money.

### Route Jobs with Automated Ease.

Control costs with advanced routing capabilities. Dispatcher Phoenix Professional comes with several routing processes, including Color Route, Page Count Route, and Metadata Routing. Large jobs can be automatically directed to more efficient high-volume printers. Files can be routed to appropriate printers based on whether they are color or B&W.

### Customize Print Files Automatically.

Increase the power of your workflow with Dispatcher Phoenix Professional's comprehensive set of parsing tools, which evaluate and process files based on user-defined rules. Print jobs that usually involve multiple manual steps can be completely automated, freeing up valuable resources. From simple word replacement to inserting tray calls into print streams, parsing can be a valuable tool in your workflow.

**Automation.** Process automation ideal for all businesses, print shops, and CRDs. Streamline your document processing with Dispatcher Phoenix Professional, Konica Minolta's advanced document workflow solution. With this easy-to-use and powerful solution, you can scan, index, and route documents directly from the MFP panel, using database lookups and field auto-population for quick and easy indexing. And the folder browsing feature allows you to browse through your PC's folder structure at the MFP to choose a specific folder to store your documents in.

**Connect to Document Management Systems.**

Connect to popular document management systems, such as Microsoft SharePoint®. You can scan, index, and upload your files to SharePoint directly from the MFP or streamline the process via an automated workflow. Customizable to suit your needs, this connector offers you the flexibility you need to access, share, and secure your documents.

**Expand.** Expand the Application as your needs change... you can enhance the functionality of your workflow with optional add-in modules, such as:

**File Conversion:**

Convert files to PDF file formats, such as PDF Searchable and PDF/A for archiving, or popular Microsoft Office formats, such as Word and Excel.

**Bates Stamp:**

Apply an unlimited number of Bates stamps (counters, page numbers, dates, etc.) in any position on the page.

**OCR:**

Use OCR zones to extract data from scanned documents. Rename, route and identify files based on OCR results, or import extracted data into a back-end application.

**Barcode Processing:**

Barcode recognition allows you to route, split, name, and annotate files based on barcode value. Support for standard as well as 2D barcodes is provided.

**Redaction:**

Permanently remove sensitive or confidential information from documents with intelligent Redaction technology.

**Connectors:**

Other connectors to popular content management systems are available to you. You can connect to OnBase® by Hyland, Microsoft OneDrive, Worldox® by World Software, Workshare, Box, Dropbox, OneDrive, WebDAV, FilesAnywhere, and FileAssist, Konica Minolta's cloud-based document management solution.

**Forms Processing:**

Use advanced pattern matching to search for and process important information, such as Social Security Numbers, Telephone Numbers, and Credit Card Numbers.

**Print Release Solution:**

Hold print jobs in a queue until release at the MFP by an authenticated user with Release2Me, a convenient print release solution that helps our customers secure their confidential information and eliminate unwanted or duplicate copies. With this easy-to-use feature, our customers can also specify print settings, such as number of copies, at the control panel before their jobs are released. Since users only print out the documents they need, Release2Me helps companies secure their print outs and reduce their overall printing costs.
