OXY PUR - Specifications

OXY PUR eliminates the problem at source by breaking down odour causing uric acid on both hard and soft surfaces. Specially formulated to work on difficult to clean surfaces that really hold onto their odours such as grout, mattresses, concrete, ceramic, carpets and upholstery. The oxidizing power of hydrogen peroxide makes it a great choice for removing stains left by body fluids and as pretreatment for laundry.

OXY PUR

FOR GROUT AND TOUGHER STAINS

Apply directly onto stain until completely covered. Wait 5 minutes, then rinse with water.

FOR CARPETS, MATTRESSES AND UPHOLSTERY STAINS

Blot stain with clean, dry cloth or towel to absorb excess liquid. Spray directly onto stain until completely covered. Allow to stand 5 minutes. Blot area with a clean, damp cloth. Repeated applications may be required for heavy or old stains. For large areas, it is best to use OXY PUR with a carpet extractor. Rinse with water.
