

NAVIGATING THE GDPR

an intensive one day workshop

Sessions:

Legal Considerations when Preparing to Comply with GDPR: Chris Loeffler, Special Counsel with Kelley Drye. Key topics will include:

- What is a lawful basis for processing
- Considerations when defining PII within your organization
- Preparing to prove compliance
- Leveraging a Code of Conduct

DATA! Our cyber security and data experts will provide guidance for tackling the data inventory and mapping challenges raised by the GDPR. Key topics will include:

- Prioritizing data within your organization
- Steps to compile a data inventory
- Mapping data at-rest and in-motion
- Leveraging technical tools to facilitate the mapping process

GDPR Framework Design and Implementation: We'll review the governance layer of GDPR compliance including:

- What policies should be developed
- Selecting and supporting a Data Protection Officer
- How to create a IS and security framework to facilitate ongoing compliance

Assess and Manage; We'll review the operational layer of GDPR compliance including:

- How to conduct a privacy impact assessment
- How often should vulnerability and penetration testing be performed
- How to respond to data breaches

Lessons Learned from Implementing a GDPR Compliance Program:

- Solar Winds has been working to prepare for GDPR. They will share their lessons learned and highlight key challenges they've faced.

Ongoing Compliance: What to do after May 25th, 2018 – Panel Discussion

- Our panel of experts will discuss challenges companies will face once the GDPR goes into effect and what to expect from regulators and customer. Topics will include:
 - Ongoing monitoring, ePrivacy, conflicting member states, and how to manage all of it through our Privacy Framework.
