

4.0 AUDIT & DIGITAL PLAN

Operational Performance Improvement

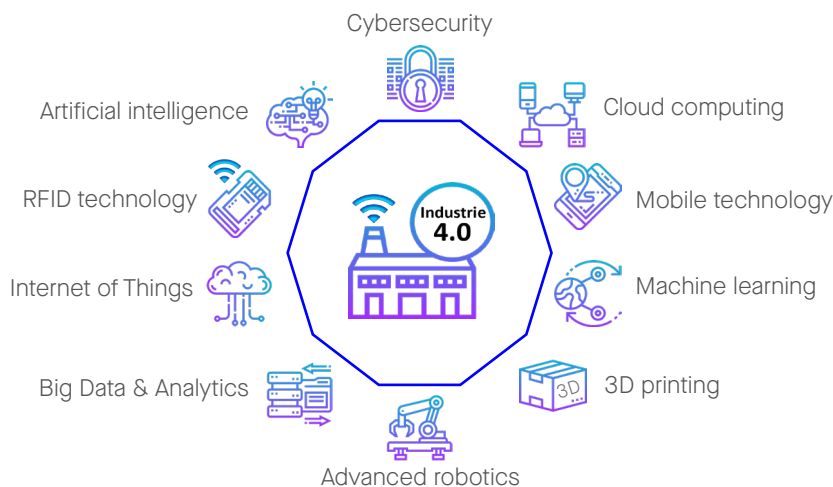

- > Locate your digital maturity
- > Assess your business processes potential
- > Advance your 4.0 Digital Transformation

A SUCCESSFUL 4.0 DIGITAL TRANSFORMATION

Createch's 4.0 Audit and Digital Plan is a new diagnosis tool aiming to support manufacturing companies in the digital transformation process initiated by the Ministry of Economy and Innovation and help them face the challenges of the new industrial revolution.

Createch's 4.0 Audit aims to:

- > Determine the maturity state of the various functions within the company to achieve a 4.0 digital transformation.
- > List priorities for a successful 4.0 Digital Transformation.

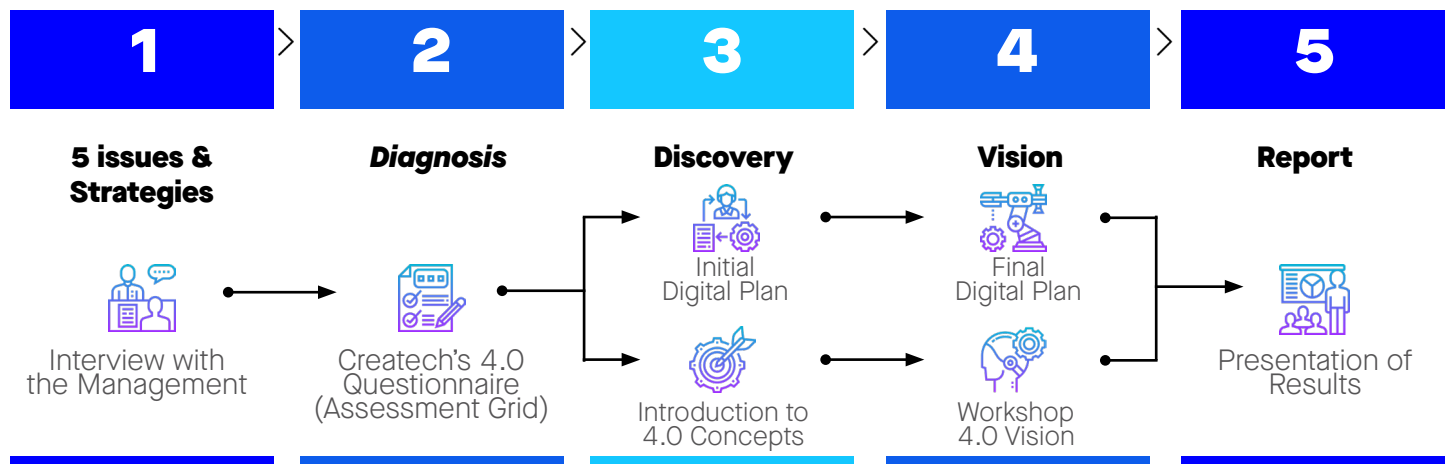

SUPPORTED FUNCTIONALITIES

- > Vision and governance
- > Manufacturing system
- > Product development
- > Planning
- > Distribution and warehousing
- > Supply Chain
- > Information technology
- > Sales and Marketing
- > Human resources

METHODOLOGY

The 4.0 Digital Transformation is part of a long-term thinking process that involves technological and organizational changes. Consequently, Createch introduced a unique and agile approach influenced by its 25 years of support to Québec's manufacturers.

4.0 AUDIT & DIGITAL PLAN

Operational Performance Improvement

- > Locate your digital maturity
- > Assess your business processes potential
- > Advance your 4.0 Digital Transformation

Ministry of Economy and Innovation financial help program

The industry 4.0 audit program aims to encourage Quebec manufacturing companies to undertake the digital shift, by carrying out a diagnosis and an industry 4.0 digital plan.

Eligible financial assistance

The financial assistance granted to the organization consists in a non-refundable contribution of up to **\$ 15 000**.

Eligible Clientele

- > For-profit companies in the manufacturing sector with establishments in Quebec.
- > Cooperatives and social economy enterprises conducting commercial activities in the manufacturing sector.

Prerequisites

The company wishing to avail itself of an industry 4.0 audit must have previously carried out **strategic planning** defining at least its mission, its vision, its strategic objectives and its operational issues.

Eligible projects

Projects related to conducting an industry 4.0 audit consist to:

- > analyze and assessing, using a diagnostic tool, the level of maturity of the company wishing to undergo the Digital Transformation;.
- > produce a report including a diagnosis, an assessment of the company's digital maturity, as well as a personalized digital plan adapted to the organizational and financial reality of the company.

Send the request

Applications must be submitted online, unless otherwise directed by the Ministry.

To access the service for the first time, your company must have a **clicSÉCUR – Entreprises account** and be registered for the services offered by the Ministry. Some delays are to be expected to process applications.
