

DMS MOBILE

LEAN mobile management system

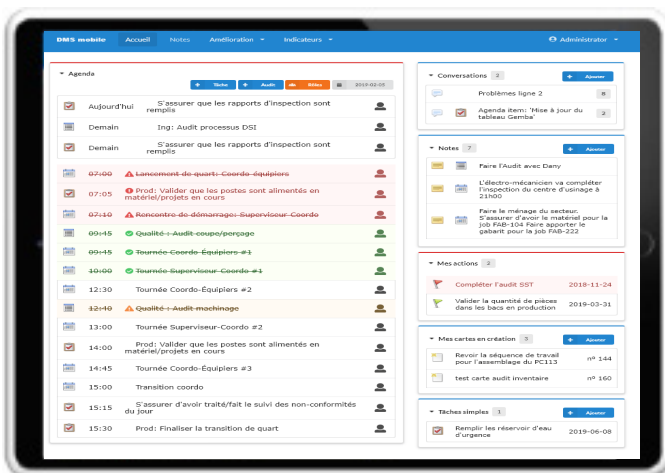

- > Simplify the daily management of your operations
- > Reduce the amount of paper documents being processed
- > Monitor your team's activities in real time

DAILY MANAGEMENT SYSTEM (DMS) LEAN is a management system focused on the processes that use the full potential of all employees. It aims to form the daily plan with frequent monitoring of the situation, a quick response to interruptions, and a structured method for the elimination of the causes.

DMS IN THE DIGITAL AGE

DMS MOBILE is an application that supports and automates the management system on a daily basis. Functional on any type of tablet or computer, the application includes many features that achieve a level of operational efficiency even higher than with the traditional version in paper format. There are several advantages to using electronic format:

- > Data analysis and custom reports
- > Design of parametric field audits
- > Control and follow-up of nonconformities
- > Exchange of information via the conversation module
- > Specific features for improvement projects management
- > Problem solving help forms
- > Real-time tracking using dashboards

STANDARDIZED AGENDAS

DMS Mobile agendas allow managers to effectively manage important activities to support operations.

- > Management meetings
- > « Gemba Walk » Floor Tour
- > Standards Audits
- > Improvement tasks
- > Support activities

PROBLEM SOLVING MANAGEMENT

Organization improvement is managed with the help of improvement cards which make it possible to define and prioritize problems, to assign tasks, and to communicate the action plans' progress.

- > Approval of improvement cards
- > Assigning cards to teams in Kanban format
- > Measurement of the workload
- > Follow up of late actions

COMMUNICATION

Notes and conversations eliminate paper and circulate information across the organization

- > Collaboration to solve certain problems
- > Participation of key players in conversations
- > Traceability of the solutions explored
- > Notes that can be linked to the elements of the agenda

DASHBOARDS

Management indicators enable monitoring and performance analysis at all levels of the organization, facilitate the maintenance of the management framework, and provide concrete supervision tools to the teams.

- > Fully configurable dashboards
- > Level of information adapted according to the user
- > Real-time performance monitoring
- > Indicators of role execution, monitoring of non compliance, ongoing actions, etc...
