

ROAR IS UNPARALLELED AUTOMATION FOR MSPS AUTOMATED DOCUMENTATION

IT Glue partners understand the value of Documentation.

Liongard’s Roar platform automatically remotes into systems to document configurations, and derives actionable insights so your team doesn’t have to. With automated and up-to-date documentation, you can strengthen the processes that grow your MSP. Spend less time on manual tasks, and more time providing value to your customers. **Where the RMM stops, Roar begins.**

- PURPOSE-BUILT FOR MSPS
- PSA INTEGRATION
- PAY-AS-YOU-GROW
- UNLIMITED USER LICENSES
- UNLIMITED CLIENT ACCESS
- MULTI-TENANT DASHBOARD
- SECURE AWS HOSTING

Answers you need, now.

MSP teams can depend on rich, automated, up-to-date, and trustworthy system configurations to quickly resolve issues and confidently answer questions.

Spur valuable actions.

Consistent and accurate data across a wide breadth of systems, paired with meaningful rules, lets MSPs stay on top of issues and changes before they become problems.

Drive profitability.

Streamlined processes require having data at your fingertips. Teams can avoid needless remote access, privileged credentials, and escalations that chip away profit.

Liongard automates the documentation process and delivers all of that data in a central location, leaving our technical resources to do what they do best, and that is fix client issues. It has been a pleasure working with them and I couldn't recommend them highly enough.

ROAR FEATURES & BENEFITS

VALUE OF AUTOMATION

FEATURE	BENEFIT
Purpose-built for MSPs	<ul style="list-style-type: none"> Having been in your shoes, we've focused on the systems, the answers you need, and where you need them
PSA Integration and Live-Tables in IT Glue	<ul style="list-style-type: none"> Your team doesn't need another platform to learn. Roar continuously updates our Configuration Items into ConnectWise and into rich tables in IT Glue
Auto-Discovery of related systems	<ul style="list-style-type: none"> You can only manage what you know. With Auto-Discovery, Inspectors will find related and child systems to give your MSP a more comprehensive scope.
Pay-as-you-grow pricing	<ul style="list-style-type: none"> We're priced per customer environment, so you're not paying for more than you need
Unlimited user licenses	<ul style="list-style-type: none"> Empower every team member with the ability to quickly answer questions and eliminate escalations
Unlimited customer access accounts	<ul style="list-style-type: none"> Give your customers visibility into their system configs, to enable self-service of routine questions
Multi-tenant dashboard	<ul style="list-style-type: none"> Whether you have 20 customers or 1000, get access to all of your customers in one central location
Secure AWS Hosting	<ul style="list-style-type: none"> Roar is software-as-a-service, so there's no need to worry about installing software, updating and patching
Rapid exports to CSV spreadsheets	<ul style="list-style-type: none"> Export data for QBRs, PBRs, and compliance reporting Offer rapid Security, Policy, & User Access Reviews
Automated & continuous documentation with Time Travel	<ul style="list-style-type: none"> Unlike anything before, Roar's Time Travel timeline feature lets you review historical snapshots so you can track changes and know when they happened. Rapid troubleshooting & root cause analysis
Change Detection	<ul style="list-style-type: none"> Since snapshots are taken at regular intervals, Roar indicates where certain critical changes have occurred
Assessments with Smart-Templates	<ul style="list-style-type: none"> Customize Roar assessments so different rule sets apply to different Customers

★★★★★

Roar empowers us to see what happened, and when, across many different vendors. Something never achieved before at this scale and price point. Let the competition hear you Roar.

Time is Money.

It's absurd to ask your highest paid team members to be technical writers.

SIMPLE ROI CALCULATOR

$$\begin{aligned}
 & \boxed{} \text{ HOUR(S) TO DOCUMENT} \\
 \times & \boxed{} \text{ \# OF CUSTOMERS} \\
 \times & \boxed{} \$ \text{ AVERAGE COST OF HOURLY RESOURCE} \\
 \hline
 = & \boxed{} \text{ TOTAL COST OF MANUAL EFFORT}
 \end{aligned}$$

For example, an MSP spending **1 hour per customer** across **30 customers**, and an **average cost of \$30 per hourly** resource, results in **\$900** of wasted manual effort PER MONTH!

SYSTEM INSPECTORS

These are just some of the critical systems for which Roar can automate documentation. You don't need to have experts on staff to have the answer you need.
