

PRODUCT BRIEF

Integral Telephones

As a leading supplier of communication systems and services, Avaya-Tenovis designs, builds and manages communication networks for over one million companies worldwide. Our goal is to develop customized business communications, offering intelligent solutions to help you increase productivity and profitability. Which in turn allow you to focus on your core business concerns: growing your enterprise and enhancing your customer relationships.

Integral Telephones

From a simple desk telephone to complex solutions – the Integral telephones offered by Avaya-Tenovis guarantee innovative and future-proof technology to meet all your requirements. Linked into a modular concept, various ISDN or IP levels of comfort can be optimally adapted to suit any work situation. Efficient communication based on an intelligent system!

More efficient communication for improved productivity

Avaya-Tenovis Integral telephones offer enormous potential for achieving cost savings on both internal and external communications. Faster, better targeted and more efficient telephony secures crucial advantages in competition-oriented customer service, increases the productivity of each workplace, and gives your staff more freedom and higher levels of flexibility. In call centers, at desks, in a factory or home office or out and about on the company premises.

Avaya-Tenovis designs individual, all-round solutions for cordless voice and data communications for small, medium-sized and larger companies.

Optimal user comfort

The Integral T3 system telephones demonstrate the technological possibilities. The interactive user navigation with clear text display developed by Avaya-Tenovis is one example. Simple, convenient and without the need for lengthy training: the desired functions can be activated by the user with the help of cursor keys and text dialog and confirmed with “OK”. Pre-programmed keys are naturally available for important functions, such as journal, automatic redial, call lists, inquiry calls or call forwarding.

High levels of investment security

The Integral system telephones designed by Avaya-Tenovis keep pace with your demands. The proprietary link technology developed by Avaya-Tenovis enables the connection of essential add-ins, such as CTI solutions, headsets, external hands-free facilities, second receivers, recording, and a second telephone, fax or modem connection.

A further benefit – the functional design

Good design combined with high-performance technology – all Avaya-Tenovis Integral telephones guarantee exemplary ergonomics coupled with a timelessly classic design. A further benefit that ensures their ideal adaptation to various workplace situations within your company.

Always mobile and accessible

Look to Avaya-Tenovis for your mobile communications solution to everyday work demands. In addition to the terminals, we also offer the planning and installation of the radio network required to ensure comprehensive coverage for cordless voice and data communications.
