

## Virtual Visit Platform | Add other participants to a call

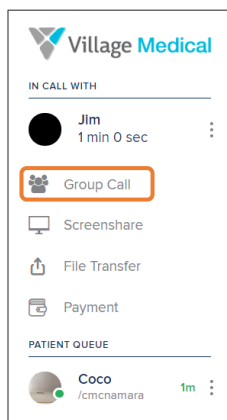

You can hold a single virtual visit session with up to ten participants from different locations. This is a great feature to have if you have several participants in different locations or need another specialist on the call.

### How to add participants to an active call

1. Start a call with the first participant by hovering your mouse over the participant's name in the **PATIENT QUEUE** and then clicking **Start Call**.

2. Once you are in the call with the first patient, click **Group Call** in the left side-bar navigation.

3. You can now select which participants (up to 10) from your patient queue should be added to the call. Once selected, click the **Confirm** button.

4. To remove an individual participant from the call, click the **Three Dots** ⋮ icon for that individual and click the **End Call** button.
