General Information and Terms of Sale

Terms of Sale

This price manual supercedes all other catalogs and/or price lists. All prices are subject to change without notice.

Shipping Terms

FOB: Shipping Point (unless noted otherwise at time of sale)

Minimum Invoice: \$50.00 Net, this excludes freight and tax where applicable

Returned Goods: Tamco will not accept returns without prior authorization. All returns are subject to a 25% restocking fee.

No credit will be issued without proper documentation. All material must be returned in new condition.

Shortages and/or Damages

Never accept any shortaged or damaged shipments without making a notation on the bill of lading.

Tamco Inc., must be notified promptly of any shortages/damages or claims will not be considered.

Tamco Inc., cannot be held responsible for delivery delays due to strikes, fires, or other conditions outside of our control.

Our responsibility ceases when goods are received by freight carriers in new condition.

All published weights are approximate. Actual shipping weights may vary.

Credit Policy

1. Tamco's credit terms are 1% -10 days, Net 30 days. (This discount applies only to merchandise; all freight charges are due in full.)
2. Repeated deviations or violation of our 30 day terms will result in an account being placed on credit hold and/or COD status.
3. Accounts with invoices unpaid beyond 60 days will be placed on credit hold and no further tools or parts will be sold until the account is current (No invoices open beyond 30 days).
4. In the event collections are required, the customer is responsible for all costs of collection.

Pneumatic Tool Limited Warranty

Tamco Inc., warrants its pneumatic tools to be free of defects in materials and workmanship, to the original purchaser, for a period of one year from the date of purchase. This warranty will not apply to any tool which Tamco Inc., deems to have been abused, modified, misused, improperly maintained, inadequately lubricated, or repaired by anyone other than an authorized Tamco repair house. Authorization to return any pneumatic tool for evaluation must be obtained from Tamco's customer service staff prior to return. All returns must be shipped prepaid to:

Tamco, Inc.

1466 Delberts Drive

Monongahela, PA 15063

No collect shipments will be accepted. Pneumatic tools shipped without authorization will be returned to the customer. Tamco Inc., guarantees to repair or replace (at Tamco's discretion) pneumatic tools at no charge to the original purchaser if defects in materials or workmanship exist at the time of inspection. Tamco Inc., makes no other expressed and/or implied warranty. Under no circumstances will Tamco Inc., be liable for damage to property or person, death, consequential, incidental, indirect or special damages of any nature arising from the sale or use of pneumatic tools.

General Tool Warranty

Tamco Inc., products are guaranteed against defects and workmanship. Tamco Inc., cannot be responsible for failures due to normal wear. Any product that has been modified, misused, abused, or suffered a lack of proper maintenance will not be recognized for a warranty claim. Warranty consideration will be given to any product found to have defects in workmanship or materials at the time of inspection. No other warranty is expressed or implied. Never use a tool for a purpose other than it's intended or designed use.

Safety Warnings and Cautions

1. ALWAYS wear approved safety gear such as hearing protection, safety glasses, hard hats, and safety shoes when using tools.
2. ALWAYS use the proper tool for the job. Do not use any tool other than the manner in which it was intended or designed.
3. NEVER strike a tool designed for an air hammer with a hand held hammer.
4. NEVER use a pneumatic tool for prying. This can cause tool failure and/or operator injury.
5. NEVER use a dull or improperly maintained tool. Failure to properly maintain tools will lead to tool failure and/or operator injury.
6. ALWAYS properly maintain air hammers. Worn parts, bushings, pistons, springs, etc can and will lead to premature tool failure.
7. ALWAYS warm tools prior to use in freezing temperatures.
8. NEVER alter any tool in any way. This can cause tool failure and/or operator injury.
9. ALWAYS use a silicon carbide grinding wheel on dull tools or drills with carbide cutting edges. Drills should be sharpened regularly after drilling 25 or more holes, depending on the hardness and abrasiveness of the material.
10. NEVER allow a pneumatic hammer to run idly. This practice allows undue stress to build in the tool and can lead to premature tool failure and/or operator injury.
11. ALWAYS use tools in accordance with all OSHA and MSHA regulations.

Air Tools - Paving Breakers

Toku paving breakers offer a rugged and reliable tool for whatever task you may have for them. Toku breakers are available in 30, 40, 60, and 90 pound classes. All Toku breakers feature a rugged four bolt back head, drop forged alloy steel construction, forged latch retainers, replaceable chuck bushings, and safety levers. Optional mufflers are available.

Toku 30 and 40 pound hammers are the perfect size and weight for light to medium construction. These tools work great for demolishing black top, masonry walls, bridge decks, or digging in frozen soil.

The Toku 60 and 90 pound class breakers are designed with larger demolition jobs in mind. Whether it's breaking rock, reinforced concrete, or pavement, these breakers have plenty of power to get the job done.

Air Tools - Paving Breakers Ergonomic Style

Toku paving breakers are now offered with an ergonomic design! Toku breakers are available in 40 and 50 pound classes. These Toku breakers also feature a unique and refined technology to reduce vibration and noise levels based on 15 years of actual job site experience.

The spring dampened back head removes 50% of the vibration without power reduction.

The design of the muffler reduces the noise level by 10dBA compared to a standard tool.

MUFFLERS INCLUDED!

Air Tools - Clay Diggers / Trenchers

When it comes to digging packed soil and clay from around forms, footers, or any other construction area, you can be sure Tamco has a Toku digger to fit your needs. With three models to choose from, you are sure to find the right tool for the job at hand. The TCD-30 and TCD-20 are D-handled tools that offer maneuverability and strength in a compact package. The TRC-30 offers the comfort and control of a T-handle with the same power and performance as the TCD-30.

Toku diggers and trenchers feature four bolt back heads, drop forged alloy steel construction, forged latch retainers, replaceable chuck bushings, and safety levers. Optional mufflers are available.

Air Tools - Rock Drills

We offer multiple rock drills for a wide variety of applications. Whether you are drilling through rock, concrete, or brick, Tamco offers a rock drill that will fit your distinct requirements.

The Toku TS-55 rock drill has all the power needed for the biggest jobs. It features rugged construction and is designed for larger diameter bits and deeper drilling jobs.

The Toku TJ-20 and TJ-15 are mid-sized rock drills that pack a big punch. These drills are great for road building, shaft sinking, quarrying, as well as general demolition or construction work. Both models include standard, removable in line oilers.

The Tamco CP9-A and Toku THD-1100N are lightweight drills that are able to get into smaller spaces other drills cannot. These D-handled drills pack big power in a compact package. Recommended operation pressure is 80 - 90 PSI. Exceeding 90 PSI may cause internal damage.

*** Due to rotation of the **THD-1100N**, this tool must use Whirlibit-Speed Drill Bits ONLY.***

All rock drills feature replaceable chuck bushings, drop forged alloy steel construction, and forged latch retainers. Mufflers are available for the TJ-20, and TJ-15 models. TJ-20 and TJ-15 models include Clear-View in line oilers. **MAX PSI IS 90LBS.**

Air Tools - Rivet Busters / Tampers

Toku rivet busters are the ideal tool for any mid-sized demolition job you can throw at them. They perform under the toughest conditions, whether you're demolishing bridge decks, parking garages, ripping tanks, cutting rivet heads, or any demolition work. These hard hitting tools simply perform.

The Toku line of rivet busters are available with goose-neck or D-handles, and are available for either small buster or jumbo buster steel. All Toku rivet busters feature drop forged alloy handles, outside or inside lever designs, heat treated alloy cylinders, exhaust deflectors, and safety piston stoppers.

The Toku tamper is a rugged tool that comes with a steel tamping pad for compacting soil and substrate material around foundations, trenches, poles and other compacting applications.

Air Tools - American Made

If an American made air tool is required for your job, this is your tool. Tamco rivet busters are manufactured domestically and are a great addition to your tool needs. These tools are manufactured by American craftsmen and manufactured using high quality U.S. made components.

The Tamco brand of rivet buster will perform tasks such as bridge-deck repair, vertical and / or horizontal concrete demolition, busting rivets and bolts, and for use on underground tanks.

Try the RB-4181 model for the really tough job. Available in gooseneck or optional "T" handle in 11" or 14".

Air Tools - Chipping Hammers

Toku's rugged TCH series of "D-handle" chipping hammers are available in 2" through 4" stroke lengths. All TCH series chipping hammers feature drop forged handles, replaceable bushings, heat treated alloy cylinders, and exhaust deflectors. The TCH line of hammers features a rock solid four bolt handle for maximum reliability and durability which allows a sure grip in all conditions. The TCH series is designed to only operate when the chisel is in contact with the work surface to avoid excessive wear caused by dry firing.

MAX PSI IS 90LBS.

Toku's AA-OS chipping hammer proves bigger is not always better. It's lightweight and compact size allows for greater flexibility when working in tight spaces or small enclosures. The AA-OS is small on size but big on power.

Air Tools - Weld Flux / Needle Scalers

The SF-A1L1 and SF-A1L2 weld flux and needle scalers utilize Cleco style steel and are available with standard throttles, push type throttles, or solid backhead type.

The SF-A182 series of weld flux and needle scalers use Ingersoll-Rand style steel and are available with standard throttle, solid backhead, or pistol grip styles.

Our line of weld flux and needle scalers use advanced materials for greater longevity and weight reduction. Tools convert from needle scaler to weld flux scaler quickly and easily.

We also offer an imported version of the Cleco weld flux and needle scaler, as well as replacement parts and needles for all of the tools. **MAX PSI IS 90LBS.**

(The SF-A1L1 and SF-A182NS come with a bag of 19 standard 7" needles.

Tamco's patented Seize-Free carbide drill bit combines a unique, spiral fluted design with increased air flow to the carbide tip. This prevents drill binding, the most common problem encountered when drilling through pavement overlays such as asphalt, concrete and stone.

Tamco Hard Tipped Drill Bits

Over 45 years of experience producing quality carbide tipped drills for use with pneumatic drills has resulted in products which perform the toughest of jobs. Our drill bits perform with huge success in all construction and/or demolition applications.

Tamco carbide tipped drill bits used in rotary percussion hammers will drill hundreds of holes in granite, and a greater quantity in softer stone and concrete.

For best results and a longer tool life, the carbide insert should be sharpened frequently. It is not only easier to grind a small amount of carbide more often, rather than larger amounts of dull carbide less frequently, it also results in a minimal loss of carbide and maximum usable life of the drill bit. It is a good practice to sharpen the carbide insert after drilling 100-200 linear inches. This measure will vary accordingly to the hardness and abrasiveness of the material being drilled. It is important to maintain the original curvature of the carbide along with the 110 degree cutting angle during the sharpening process. Tamco can provide you with a drill guide to check and maintain the proper profile and cutting angle.

Dull carbide will cut slowly and will require more energy to drill a hole. This extra energy is absorbed by the drill, which can result in fractured carbides, failure of the steel, and/or a failure of the brazing which attaches the carbide into the steel. Dull carbides should be sharpened on a Green Silicone Carbide grinding wheel with a grit size of approximately 80 grit. These wheels are readily available at most industrial suppliers. Following these procedures will result in faster drilling, more holes drilled per bit, and fewer failures.

Tamco Hard Tipped Drills

****For Best Results****

- | | |
|---|---|
| 1. DO grind carbide after 50 holes | 6. DON'T hollow grind |
| 2. DO rotate use of drills | 7. DON'T put J10 or L27's in old adapters |
| 3. DO grind to a 110 degree angle | 8. DON'T grind to a knife edge |
| 4. DO use cut outs as guides | 9. DON'T let drill get dull |
| 5. DO leave slight flat on the cutting edge | 10. DON'T quench in water |
