

AVG Business CloudCare

Make even the smallest customer more profitable.

When customers have high expectations but modest budgets, we help you enhance your service and margins.

AVG® Business CloudCare is a free, web-based security portal with remote IT that simplifies how you manage all your customers' networks from a single, central platform and pay-as-you-go services that delivers the essential services every business needs...

Make more money

Help boost your profit margins with cloud services and demonstrate added value to your customers. Identify revenue opportunities with real-time sales alerts.

Lower costs

Pay only for the services your customers use. With remote access and one-click activation, costs are minimised so even your smallest customers can be profitable.

Save time

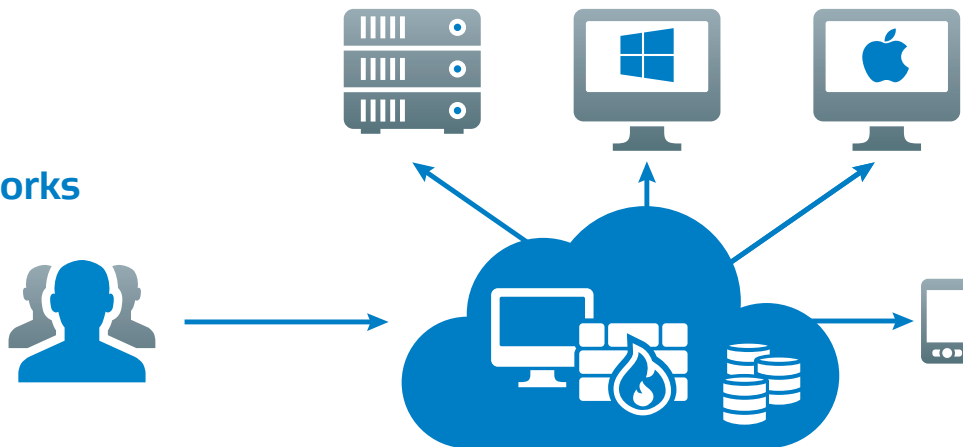

Remotely manage your customers from our free, cloud-based administration platform, enabling you to save both time and travel costs. Real-time and automatic updates mean less work for you.

- Web-based access
- FREE remote management tool
- One-click customer and service activation
- Real-time alerts and sales alerts
- Flexible and co-branded reporting
- 30-day trials for multiple services
- Easy policy management
- No upfront investment
- No licence keys, no seat limits
- AVG® Business CloudCare Forum

Success with the small business, simplified.

How it works

Every essential service ...from one free web portal

Protecting networks, securing email, improving efficiency, storing data, securing access and solving IT issues... just got simpler and more profitable.

AVG® AntiVirus 30-day trial
Better protection for customers,
and recurring revenue for you

Offer your customers the latest protection without draining your resources. A single, central management platform alerts when issues arise and enables you to push policies and automatic updates across all your accounts - and all without heavy, hands-on management.

AVG® Content Filtering 30-day trial
Block threats and reduce
distractions on the web

Help your customers block threats by excluding access to malicious websites – and help boost their productivity by managing web access based on usage policies of their choice.

AVG® Remote IT FREE
Rapid response support without
the cost of on-site visits

Resolve customer issues rapidly and remotely with one-click connections that let you access customer workstations and servers from the security portal.

AVG® Secure Sign-On New for 2015
Make secure access to all
services simple, across all
your compatible devices

Simplify how you protect and manage the SaaS and mobile applications your customers are accessing from their BYOD and business devices.

AVG® Cloud Backup 30-day trial
Protecting customer data
securely and ensuring it's
available when needed

Protect customer data from loss and theft with regularly scheduled backups that run automatically. Restore anywhere from a single file to an entire directory if data becomes lost or corrupt in the customer's environment.

AVG® Email Security Services
Stops spam, secures email,
simplifies management

Offer your customers the essential email services they need – from blocking viruses and spam to complying with industry regulations and privacy requirements. Deploy, manage, and update these services remotely from wherever you are without additional hardware or third-party software. Includes: AVG® AntiSpam, AVG® Email Archive, AVG® Email Archive Lite and AVG® Encrypted Email.

Only AVG Business CloudCare delivers all these services from a single, integrated security portal.
