

CASE STUDY – BRENT CIVIC CENTRE

Project Requirement:

Situated in the shadow of Wembley Stadium the new offices for the council for London Borough of Brent has achieved BREEAM outstanding status. Along with this the blinds were required to work in conjunction with the natural ventilation system which opened the windows automatically to provide natural cooling. Blinds to allow airflow, yet still give shade.

Solution

Labetts installed over 700 perforated slat venetian blinds. These systems give excellent shading with their tilted slats, whilst allowing natural airflow between and through the perforated slats.

Products Installed

- Electric and Manual Venetian Blinds.
- Chain operated roller blinds
