# Industrial Symbiosis for Circular Economy in India

Providing a market place and  
innovation hub for Circular  
Economy

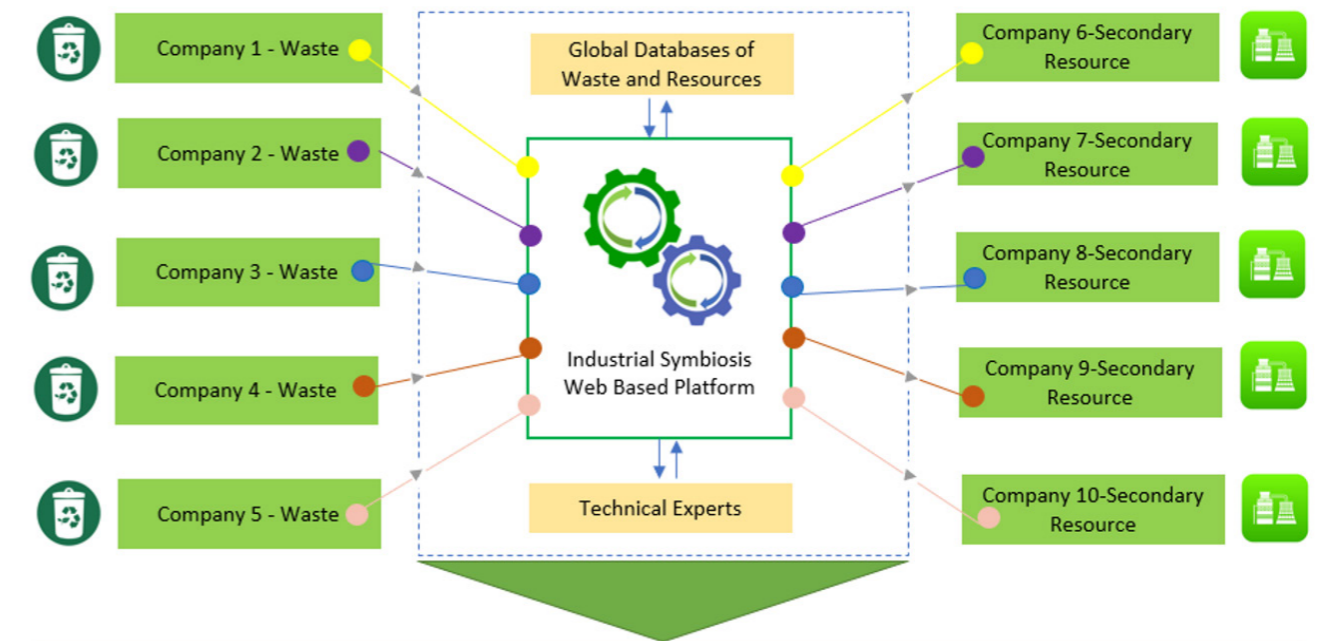

The unique Industrial Symbiosis for Circular Economy platform is the market place and innovation hub for developing secondary resources through symbiosis amongst donor and acceptor industries.

### The unique features & benefits of the platform

- ✓ Explore new opportunities, innovation and potential collaboration on secondary resource utilization amongst Indian industries
- ✓ Use Materials management and scenario analysis with waste streams from one industry sector as an input for another
- ✓ Reduce costs, generate revenue and be environmentally sustainable while moving towards zero-waste circular economy
- ✓ Utilize dynamic cloud technology-based artificial intelligence features
- ✓ Rest assured that your data, transactions and communications on the platform are private and secure

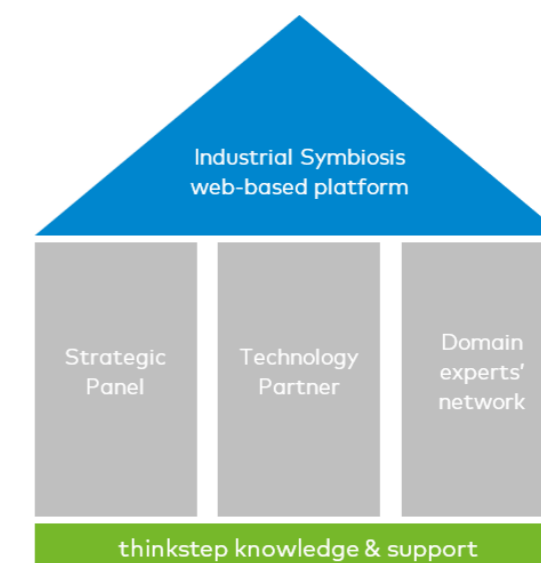

### How does the Industrial Symbiosis web-based platform work?

The platform is backed by powerful databases for wastes and secondary resources connections along with technical expertise support.

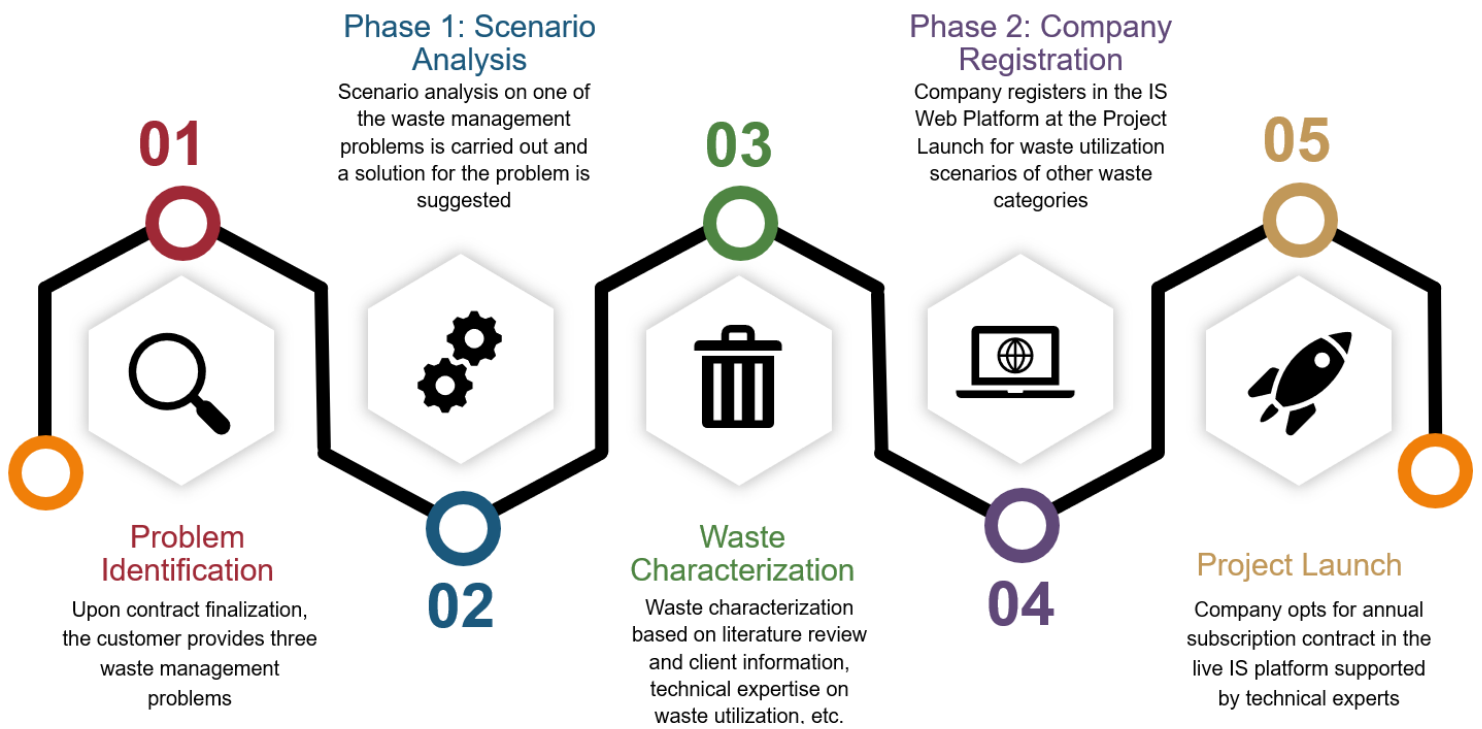

- Outcomes**
- ✓ Artificial Intelligence mapping of donor and acceptor industries
  - ✓ Technical expert to overcome mapping barrier and identify commercially viable opportunity and innovation
  - ✓ Potential utilization of waste through substitute/exchange of resources
  - ✓ Boost circular economy and reduce environmental impacts
  - ✓ Cost savings
  - ✓ Compliance
