

JOB DESCRIPTION

Security Consultant - Risk and Master Planning

Line Manager: VP – Professional Services

Location: UAE and wider GCC

Positions:

- The consultant must have the following years of experience depending on his role:
 - Junior: Up to 3 years
 - Mid: 3 to 5 years
 - Senior: 5 to 10 years
 - Principal: More than 10 years

Requirements

- The job requires a consultant with expertise in a risk-based approach to design in the built environment. The individual has been consulting in a FEED environment.
- The individual should be able to plan consulting assignments – schedules, costings, resource plans and bills of materials
- The individual must have experience in writing proposals and bids, and have an understanding of project finance, contracts and commercials
- The individual must come from a background in strategic risk and master-planning in the built environment within either:
 - The mainstream built environment
 - Critical National Infrastructures or
 - National Security
- The role will involve the security consulting specifically in conducting Strategic Risk Assessments and Threat and Vulnerability Assessments. It will also involve capturing clients operational requirements and critical success factors, managing stakeholder engagement and running requirements and master-planning workshops with clients and stakeholders
- Further the job will involve supporting the VP Consulting in the production of proposals and bids and also in ensuring projects go through the proper review and governance process
- This role requires the individual to act as the lead on Stage C concept study work-streams.
- In addition, the consultant must support the 'win business' process. The consultant must therefore have an understanding of other areas of expertise in the following areas:
 - Project and programme management
 - Risk analysis and management (quantified risk management techniques)
 - Cyber security
 - Security engineering and design
 - Counter terrorism engineering – blast, ballistics, CBRN
 - Command & control, PSIM and systems integration

Experience

The candidate should have experience in:

- Secure by design process
- Working as part of multi-disciplinary design teams within the built environment and working to RIBA design stages
- Providing threat based design guidance for security systems to clients covering:
 - Physical protection systems (gates, barriers etc)
 - Electronic systems (CCTV, Access Control etc)
 - Command and control
 - Systems integration
 - Security operational procedures and emergency planning
 - Information Assurance
- The candidate should have experience in producing output specifications for security systems design
- The candidate should have experience in project managing multi-disciplinary teams within the

technical security space

- The candidate should have experience in requirements engineering techniques
- The candidate should have experience in CPTED
- The candidate should have experience in proposal writing and bid submissions
- The candidate must understand the physical security consulting environment in Qatar and the in the UAE
- The candidate must have successfully delivered Stage C and SRA work-packages in the built environment within the UK and GCC region

Skills

The candidate must have the following skills:

- Conduct of SRAs
- Secure by design Master-planning
- Business analysis and requirements engineering
- Threat and vulnerability assessments
- Geopolitical risk and CT design
- The ability to negotiate and brief external agencies including the relevant MOI and police advisors

Attributes

The candidate should be confident and work well within multi-disciplinary teams. In addition the candidate should be able to prove:

- The ability to plan unstructured problems and assignments from scratch
- The ability to present plans and proposals to clients
- The ability to run workshops and seminars with clients
- The ability to learn quickly and to work well under pressure
- The ability to listen attentively and express complex issues concisely to clients
- To show leadership and motivate teams

Qualifications

The following qualifications are desirable:

- Degree level qualified – top 25% percentile from an established university in the UK/US/Canada/Australia
- Member of professional body that is relevant to the technical security environment (such as but not limited to):
 - IEE
 - CLAS
 - CISSP
 - APM
 - ICE
 - CPP
 - PSP
 - CIMC
 - CEng
- A masters degree in a relevant security or consulting discipline is desirable
