Make every classroom safer
When an emergency strikes, Safe Classroom allows you to instantly send an audible alert to every classroom computer. You can alert your classrooms at the district or school level, and you can set different audible tones to match specific types of emergencies.

Connect every classroom through communication
• Staff can send and receive safety information
• Multi-media messaging allows you to communicate more clearly
• Keep everyone informed throughout an emergency

Deployment that is as quick as it is easy
• You can deploy Safe Classroom to every computer in your district in minutes
• Your teachers won't have to worry about setup or logging in
• In one week, you can make your school district safer

"Every superintendent has the opportunity to make a proactive school safety difference, and I know of no better partner than CrisisGo."

Dr. Joseph Erardi, Jr.
AASA Executive Board Member

AASA
THE SCHOOL SUPERINTENDENTS ASSOCIATION

CRISIS GO
safety through communication

AASA, along with CrisisGo, has the goal of making every classroom safer NOW. The security of your staff and students cannot wait.
